

Increase internal efficiency

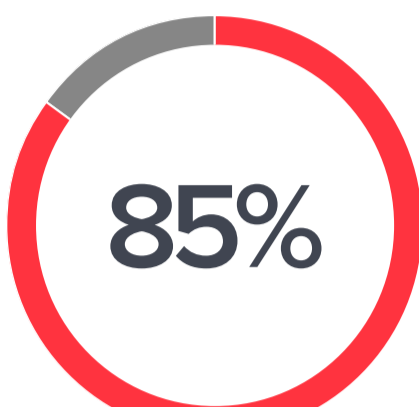

The average worker wastes 22 minutes a day dealing with IT-related issues.

(Robert Half)

Business executives work an average of 62.5 hours a week, which is over 50% more than traditional 40-hour work weeks.

(HBR)

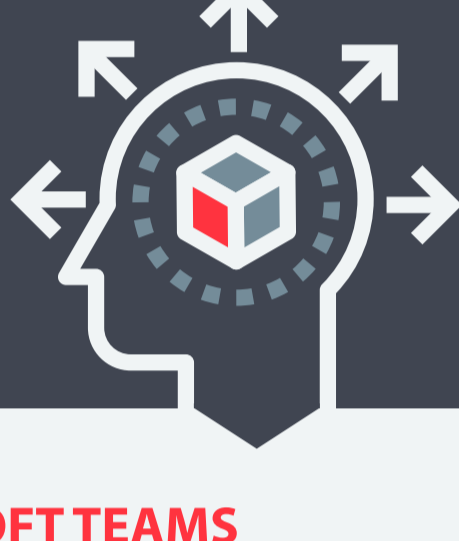

85% of employees lose at least 1-2 hours of productivity a week searching for information.

(Dynamic Signal)

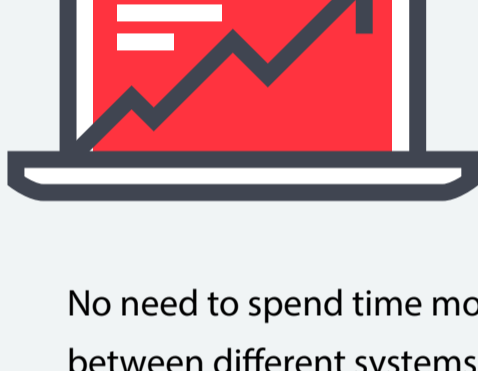

Improve workflows with a chatbot for Microsoft Teams

IT WORKERS ARE BUSY

IT support staff can quickly become overwhelmed by increasing user requests and problems.

RESOLVE ISSUES IN MICROSOFT TEAMS

Increase response speeds with a Help Desk chatbot that can take some of the workload off IT staff. Employees can engage with a virtual assistant to quickly resolve system issues.

No need to spend time moving between different systems to hunt down answers and resolve IT issues. Reduce the risk of interruption to business processes with a smart assistant added to Microsoft Teams.

HR IS OVERLOADED

Employees frequently make requests of HR when answers to common questions are not readily available.

PROVIDE ANSWERS QUICKLY

Relieve HR, Accounting, and Admin departments from answering frequently asked questions with an internal chatbot inside of Microsoft Teams.

Alleviate HR workloads with a chatbot that can successfully answer employees' frequently asked questions. Employee needs are fulfilled, and HR is able to focus on other critical tasks.

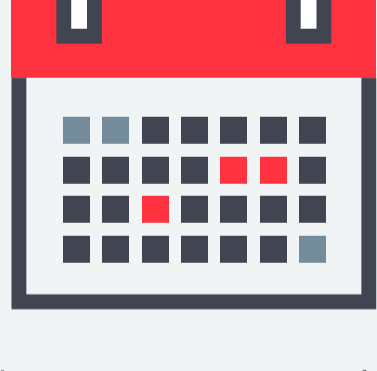

YOUR TIME IS VALUABLE

Managers don't have time to waste. They need to make decisions quickly but are forced to switch between different systems to perform tasks.

EXECUTE DECISIONS EFFICIENTLY

Give managers a chatbot that facilitates faster decision making, from approving documents to creating and monitoring new mandates, planning meetings, and more.

Increase your company's return on investment in Microsoft Teams with a helpful chatbot that automates executive workflows and saves organizations thousands of dollars per year.

Resolve issues.
Provide answers.
Execute decisions.
Microsoft Teams.
