Shufflrr AI Blob: Presentations that Follow the Conversation

shufflrr

The best conversations don't follow a script. Your presentations shouldn't either.

Your Secure AI Presentation Server

Shufflrr Blob uses AI to surface approved slides, PDFs, and other content in real time based on the live conversation. Enterprise teams present more efficiently and confidently without losing control, accuracy, or compliance.

Find

Surface the right slides instantly from PowerPoint, SharePoint, and approved content libraries.

Protect

No public data.
No generated content. Only approved content governed by existing permissions.

Present

Stay in control as the conversation evolves. Preview, approve, and present slides in real time.

Works with the Tools Your Teams Already Use:

Built for Enterprise Control

Your content is managed securely with automated governance in place.

Approved Content

Surfaces slides only from trusted internal libraries.

Enterprise Ready

Designed for regulated and compliance-driven industries.

Permission Aware Access

Respects existing Microsoft permission structures.

Hallucination-Free

Retrieves existing slides, never generates content

No Public Data Exposure

Content is never sourced from or shared with public AI systems.

Trusted by Enterprise Clients

Present Confidently with Shufflrr

"Shufflrr makes it easy for our team to find and use the right content and confidently represent our company every time."

Shannae Murray,
Sales Training Manager, Royal Caribbean

Let the Conversation Lead the Presentation

Shufflrr AI Blob keeps presentations aligned with the live conversation by surfacing relevant approved slides in real time.

1. **Conversation-Driven Retrieval**
   Surface relevant slides automatically during live conversations.
2. **Voice and Prompt Controls**
   Use voice or typed prompts during meetings, demos, and presentations.
3. **Role-Based AI Agents**
   Interpret questions through different business perspectives and functions.
4. **Build Decks on the Fly**
   Save surfaced slides as a PowerPoint deck after the meeting.
5. **Multimedia Intelligence**
   Surface video clips at precise timestamps using transcript-aware playback.
6. **Natural Presentation Flow**
   Let presentations evolve naturally instead of relying on rigid pre-built decks.

Present Intelligence in Real Time with Shufflrr Blob

shufflrr

Shufflrr Blob is an AI presentation server that gives teams complete control over live presentations by letting content adapt to the conversation in real time.
