PAID IMPLEMENTATION · AZURE

Azure Virtual Desktop
4-Week Implementation

Give your team secure Windows desktops and apps from any device, deployed and optimized on Azure Virtual Desktop in four weeks.

Timeline: 4 weeks | **Remote delivery** | **Documented handover**

20+ Years of Technology Experience | Serving Clients Worldwide

WHO THIS IS FOR

IT leaders and operations managers who need secure remote or hybrid access, want to retire on-premises VDI or Remote Desktop Services, or support contractors and seasonal staff without shipping laptops.

HOW THE ENGAGEMENT RUNS

1
Plan and prepare
WEEK 1

Review requirements, confirm Microsoft Entra ID and Active Directory integration, networking and admin roles.

2
Deploy
WEEK 2

Build host pools, session host images and app groups for desktops and remote apps.

3
Optimize
WEEK 3

Set up FSLogix profile containers, OneDrive policies, Azure Files storage and autoscaling.

4
Validate and hand over
WEEK 4

Pilot with users, tune performance and security, train administrators and deliver documentation.

WHAT'S INCLUDED

- **Production-ready Azure Virtual Desktop environment with host pools and app groups**
- **FSLogix user profiles and file migration to Azure Files**
- **Autoscaling plan to control compute cost**
- **Security baseline, including Conditional Access and multifactor authentication**
- **Administrator training session and end-user quick-start guide**
- **As-built documentation and recommended next steps**

TIMELINE AND NEXT STEP

4 weeks · remote delivery

Final scope is confirmed with you in a short scoping call before the engagement starts.
