Data and Security Readiness Assessment

1

● Comprehensive Analysis

Assessment covers all facets of data protection, from sensitive data identification to user activity monitoring, ensuring no stone is left unturned

3

● Expert Guidance

Leverage the expertise of our seasoned professionals who specialize in Microsoft 365 security and compliance

2

● Tailored Recommendations

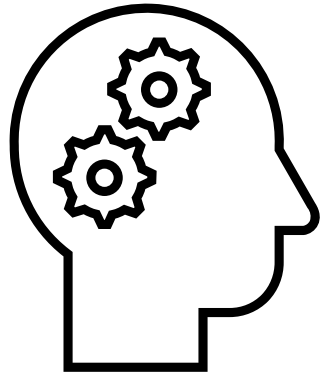

Receive actionable insights and specific recommendations that align with your unique organizational needs and goals

4

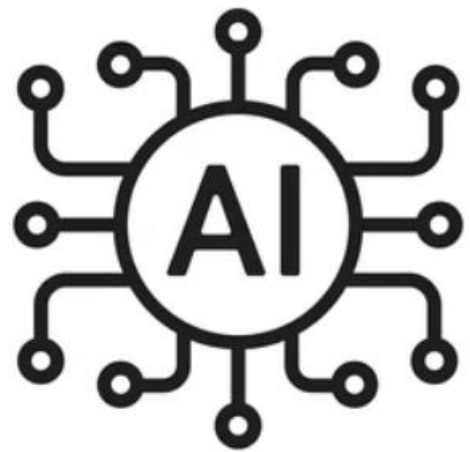

● Enhanced Confidence

Gain peace of mind knowing your data and security measures are optimized, allowing you to focus on core business operations

WE FOLLOW RESPONSIBLE **AI REGULATIONS**

We follow responsible AI regulations and prioritize ethical practices to ensure that Microsoft Copilot is implemented and used in ways that uphold six main principles of **Fairness, Transparency, Accountability, Reliability and safety, Privacy and security and Inclusiveness.**

This forward-thinking approach reduces risks and prevents harm, while also building trust, credibility, and fostering a positive influence on the acceptance of AI within the organization and the broader community.
