

Teams AI Bot Customization Workshop

Tailoring AI Solutions for Your Enterprise

Agenda

- Service Overview
- How We Support Microsoft 365 Adoption and Extension
- Workshop Agenda
- Deliverables and Outcomes
- Prerequisites
- Resources Provided
- Pricing
- Conclusion

Service Overview

- Intensive One-Day Workshop
 - Explore and leverage AI capabilities within Microsoft Teams
- Custom AI Bots
 - Tailored to your specific enterprise needs
- Hands-On Session
 - Utilizes Copilot Studio and Azure OpenAI
- Envision and Prototype AI Solutions
 - Address your unique business challenges

How We Support Microsoft 365 Adoption and Extension

- Exploring advanced AI integration possibilities within the Microsoft 365 ecosystem
- Guiding you in conceptualizing and prototyping custom AI solutions
- Demonstrating how tailored AI bots can streamline your workflows
- Providing hands-on experience with Microsoft 365 developer tools and APIs

Workshop

Agenda:

Introduction to AI Bots in Microsoft 365

- Overview of Microsoft 365 integration possibilities
 - Discover the potential of AI in Microsoft 365
- Identifying opportunities for AI enhancement
 - Improve your specific Microsoft 365 workflows

Workshop Agenda: Hands-on Bot Development with Copilot Studio

- Hands-on Bot Development with Copilot Studio (2.5 hours)
 - Creating bots that address your organization's unique needs
 - Integrating Azure OpenAI for advanced natural language processing tailored to your industry

Workshop Agenda: Enterprise Use Cases and Customization Strategies

- Analyzing successful AI bot implementations across various industries
- Brainstorming potential applications specific to your organization

Advanced Topics: Teams-AI Development Framework

- Exploring Microsoft 365 APIs for deeper customization
 - Developing complex bots that align with your organization's specific requirements

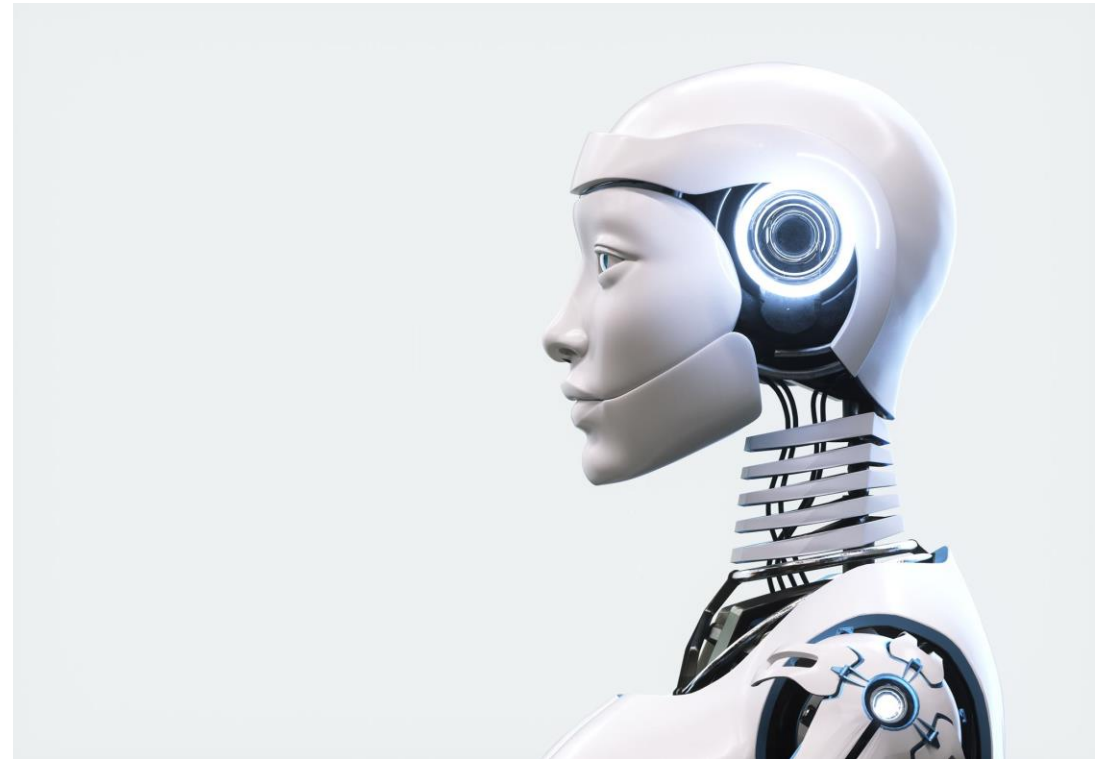

Workshop Agenda: Prompt Engineering for Your Business Context

- Crafting prompts that reflect your company's voice and needs
- Ensuring seamless user experience across your Microsoft 365 apps

Workshop Agenda: Wrap-up and Customization Roadmap Discussion

- Strategy for implementing custom AI solutions in Microsoft 365 environment
- Q&A session on extending Microsoft 365 capabilities through tailored AI solutions

Deliverables and Outcomes

- Conceptual framework for AI bots that address your specific business needs
- Understanding of how to leverage AI to extend Microsoft 365 capabilities in your unique context
- Knowledge of best practices for integrating custom AI solutions within Microsoft 365
- Prototype or mockup of a custom bot aligned with your organizational requirements
- Tailored roadmap for AI implementation across your Microsoft 365 suite

Prerequisites

- Basic familiarity with Microsoft 365 applications
- Laptop for hands-on exercises
- Openness to exploring AI solutions for your specific business challenges

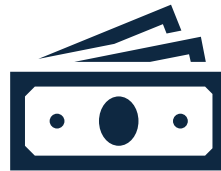

Resources Provided

Microsoft 365 E3 Trial Account

90-day trial for each participant

Azure OpenAI Tokens

Valued at \$150 for development and testing

Sandbox Environment

For safe experimentation and learning

Pricing

- Base Price for 3 Participants
 - Estimated \$500 for up to 3 participants
- Additional Participants
 - \$150 per person beyond the initial 3

Number of Participants	Price
Up to 3	\$500
Additional Participants	\$150 per person

Conclusion

- Equips your team with knowledge and hands-on experience
 - Conceptualize and implement AI-powered bots
 - Tailored to your organization's unique needs
- Drive innovation and productivity
 - Within your Microsoft 365 environment
