

# Power Platform

Get support from **Microsoft Power Platform** experts to speed up automation and improve the quality of your solutions

GET 1 HOUR CONSULTATION FOR FREE

## Systemz experts

will help direct your employees in the right direction, develop better solutions, minimize errors and reduce automation costs by 30%

Savings on expensive specialists up to **50% of salary**

### Why do you need technical support

- Using best practices of Power Platform application development developed as a result of projects for dozens of customers
- Save up to 20% of development time by providing the right technical solutions and no need to make changes
- Improving the quality of solutions by creating the right architecture and technical solutions

### Technical support areas

- Collaborative solution architecture development
- Analysis of the implemented solution and development of recommendations
- Help in developing complex functionality
- Help with technical problems
- Training of staff

### We'll tell you how it works

- Ability to schedule an online call with a consultant to work through questions
- Ability to receive prompt answers by e-mail or via Teams
- Ability to send the terms of reference for analysis and get the architecture worked out

### What will your company get as a result

- The ability to quickly replenish lost competences in the event of an employee leaving the company or staff expansion
- The ability to maintain and enhance expertise within the company
- The ability to scale automation effectively for the entire company
- Recommendations on alternative possibilities for circumventing the technical limitations present in Microsoft Power Platform
