

### Writing Product Specifications is Never Easy

#### Complexity of Product Specification System

Typically, due to the complexity of the product specification system, it often requires constant communication between multiple departments, resulting in delays.

#### Impact of Poor Specifications on Clinical Development

When conducting clinical trials, it can often be delayed due to the lack of information in the manual or language barrier.

#### Multilingual Product Manuals

For example, in the EU, there are over 25 Languages that need to be covered and translation expenses cannot be overlooked.

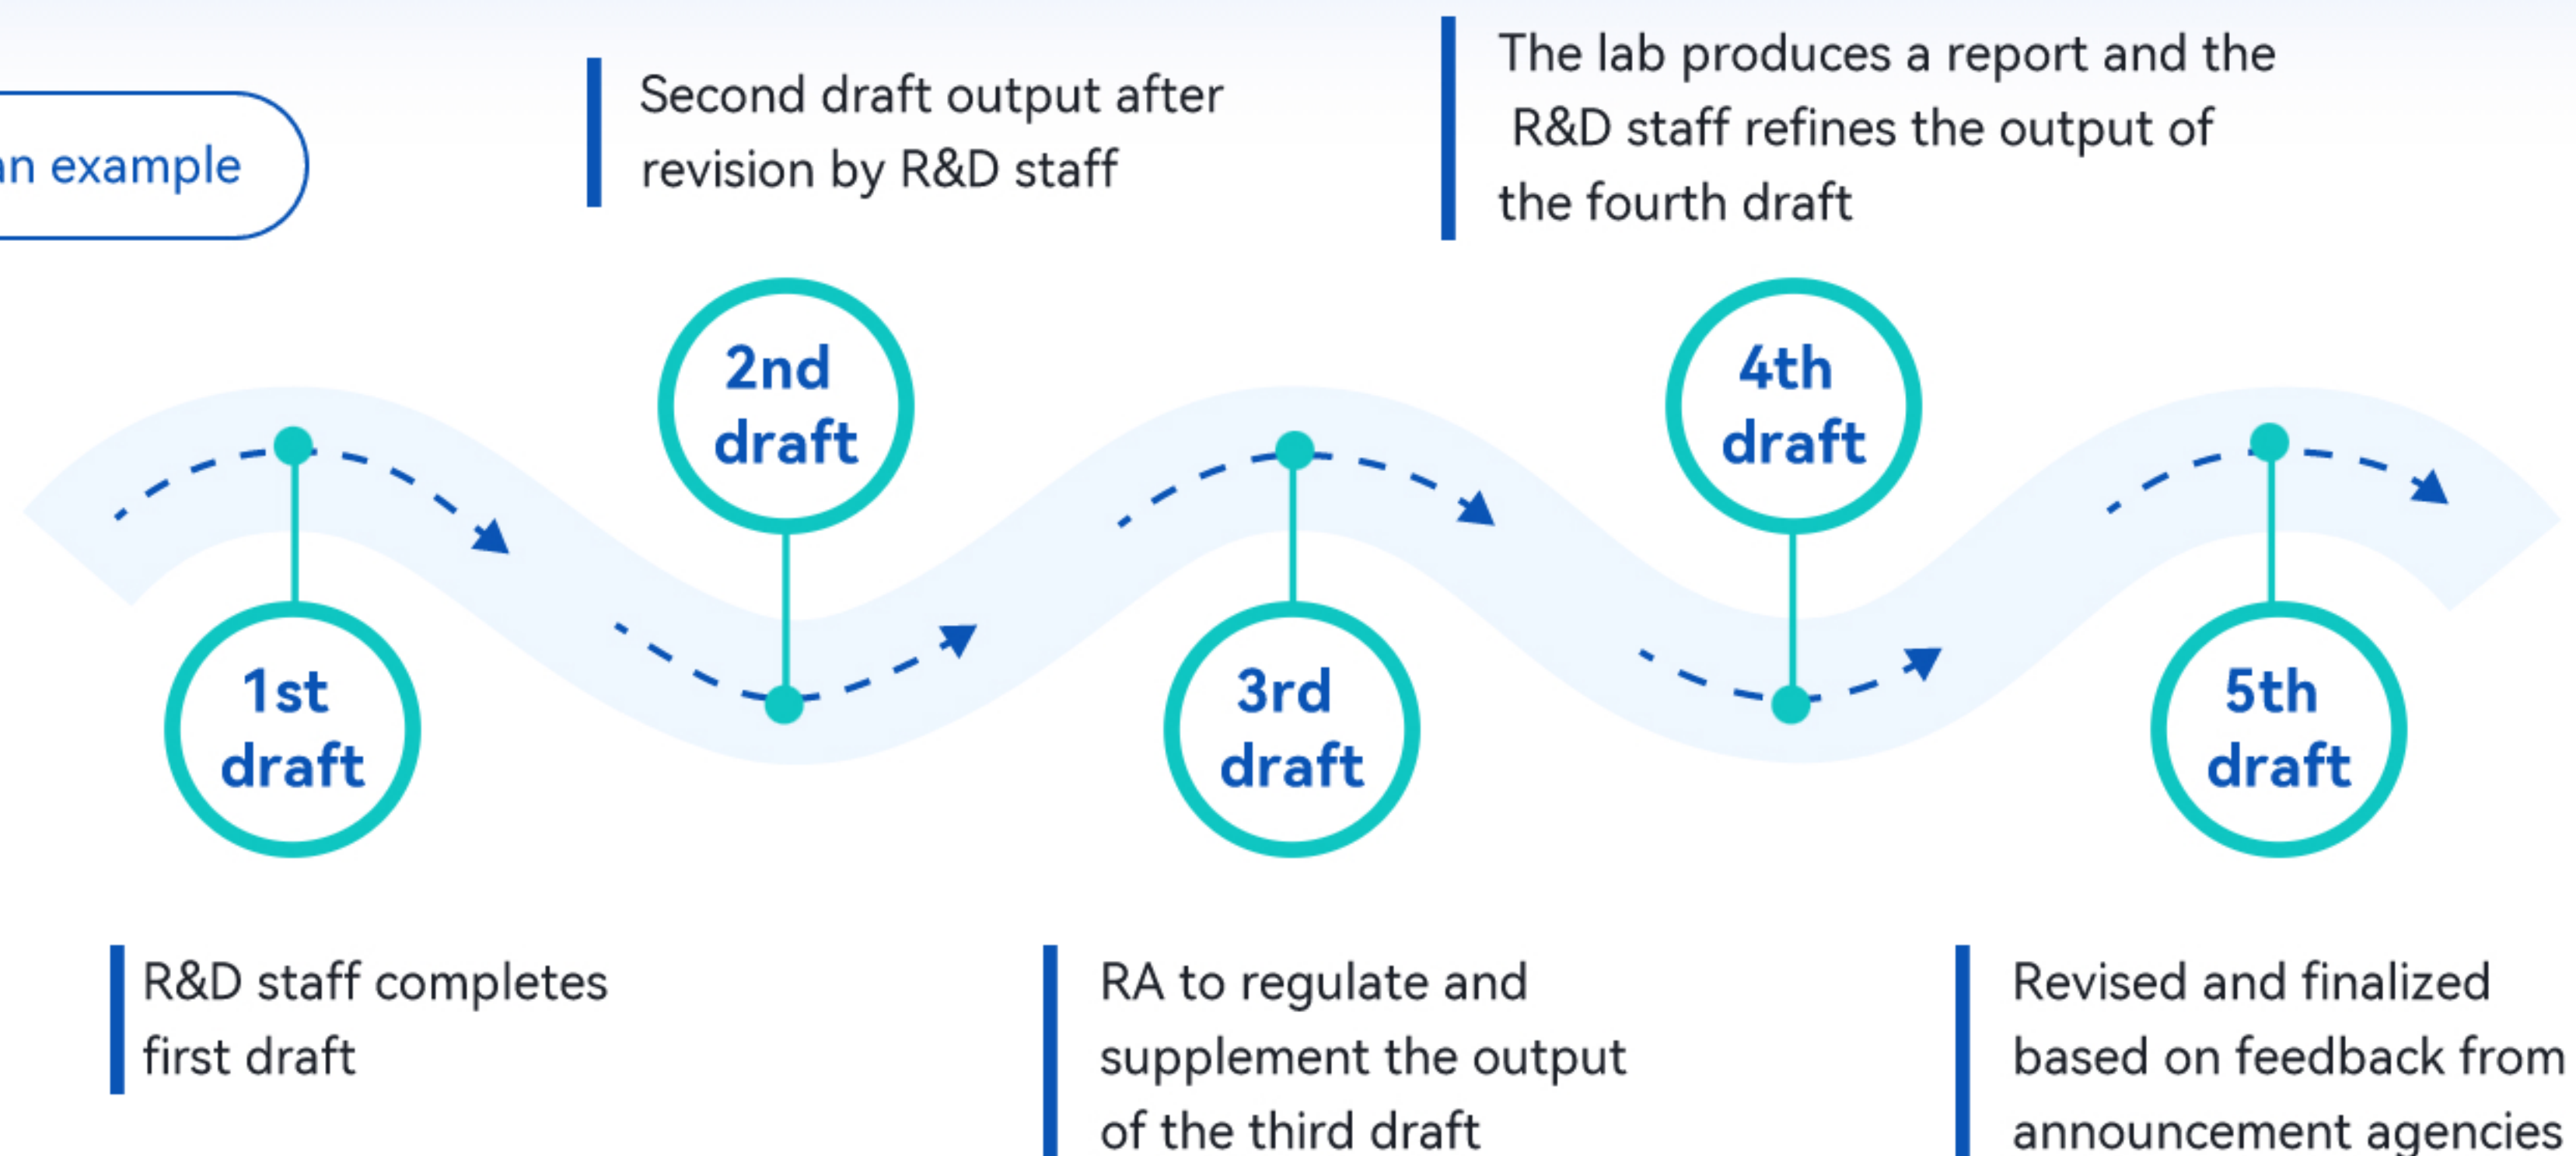

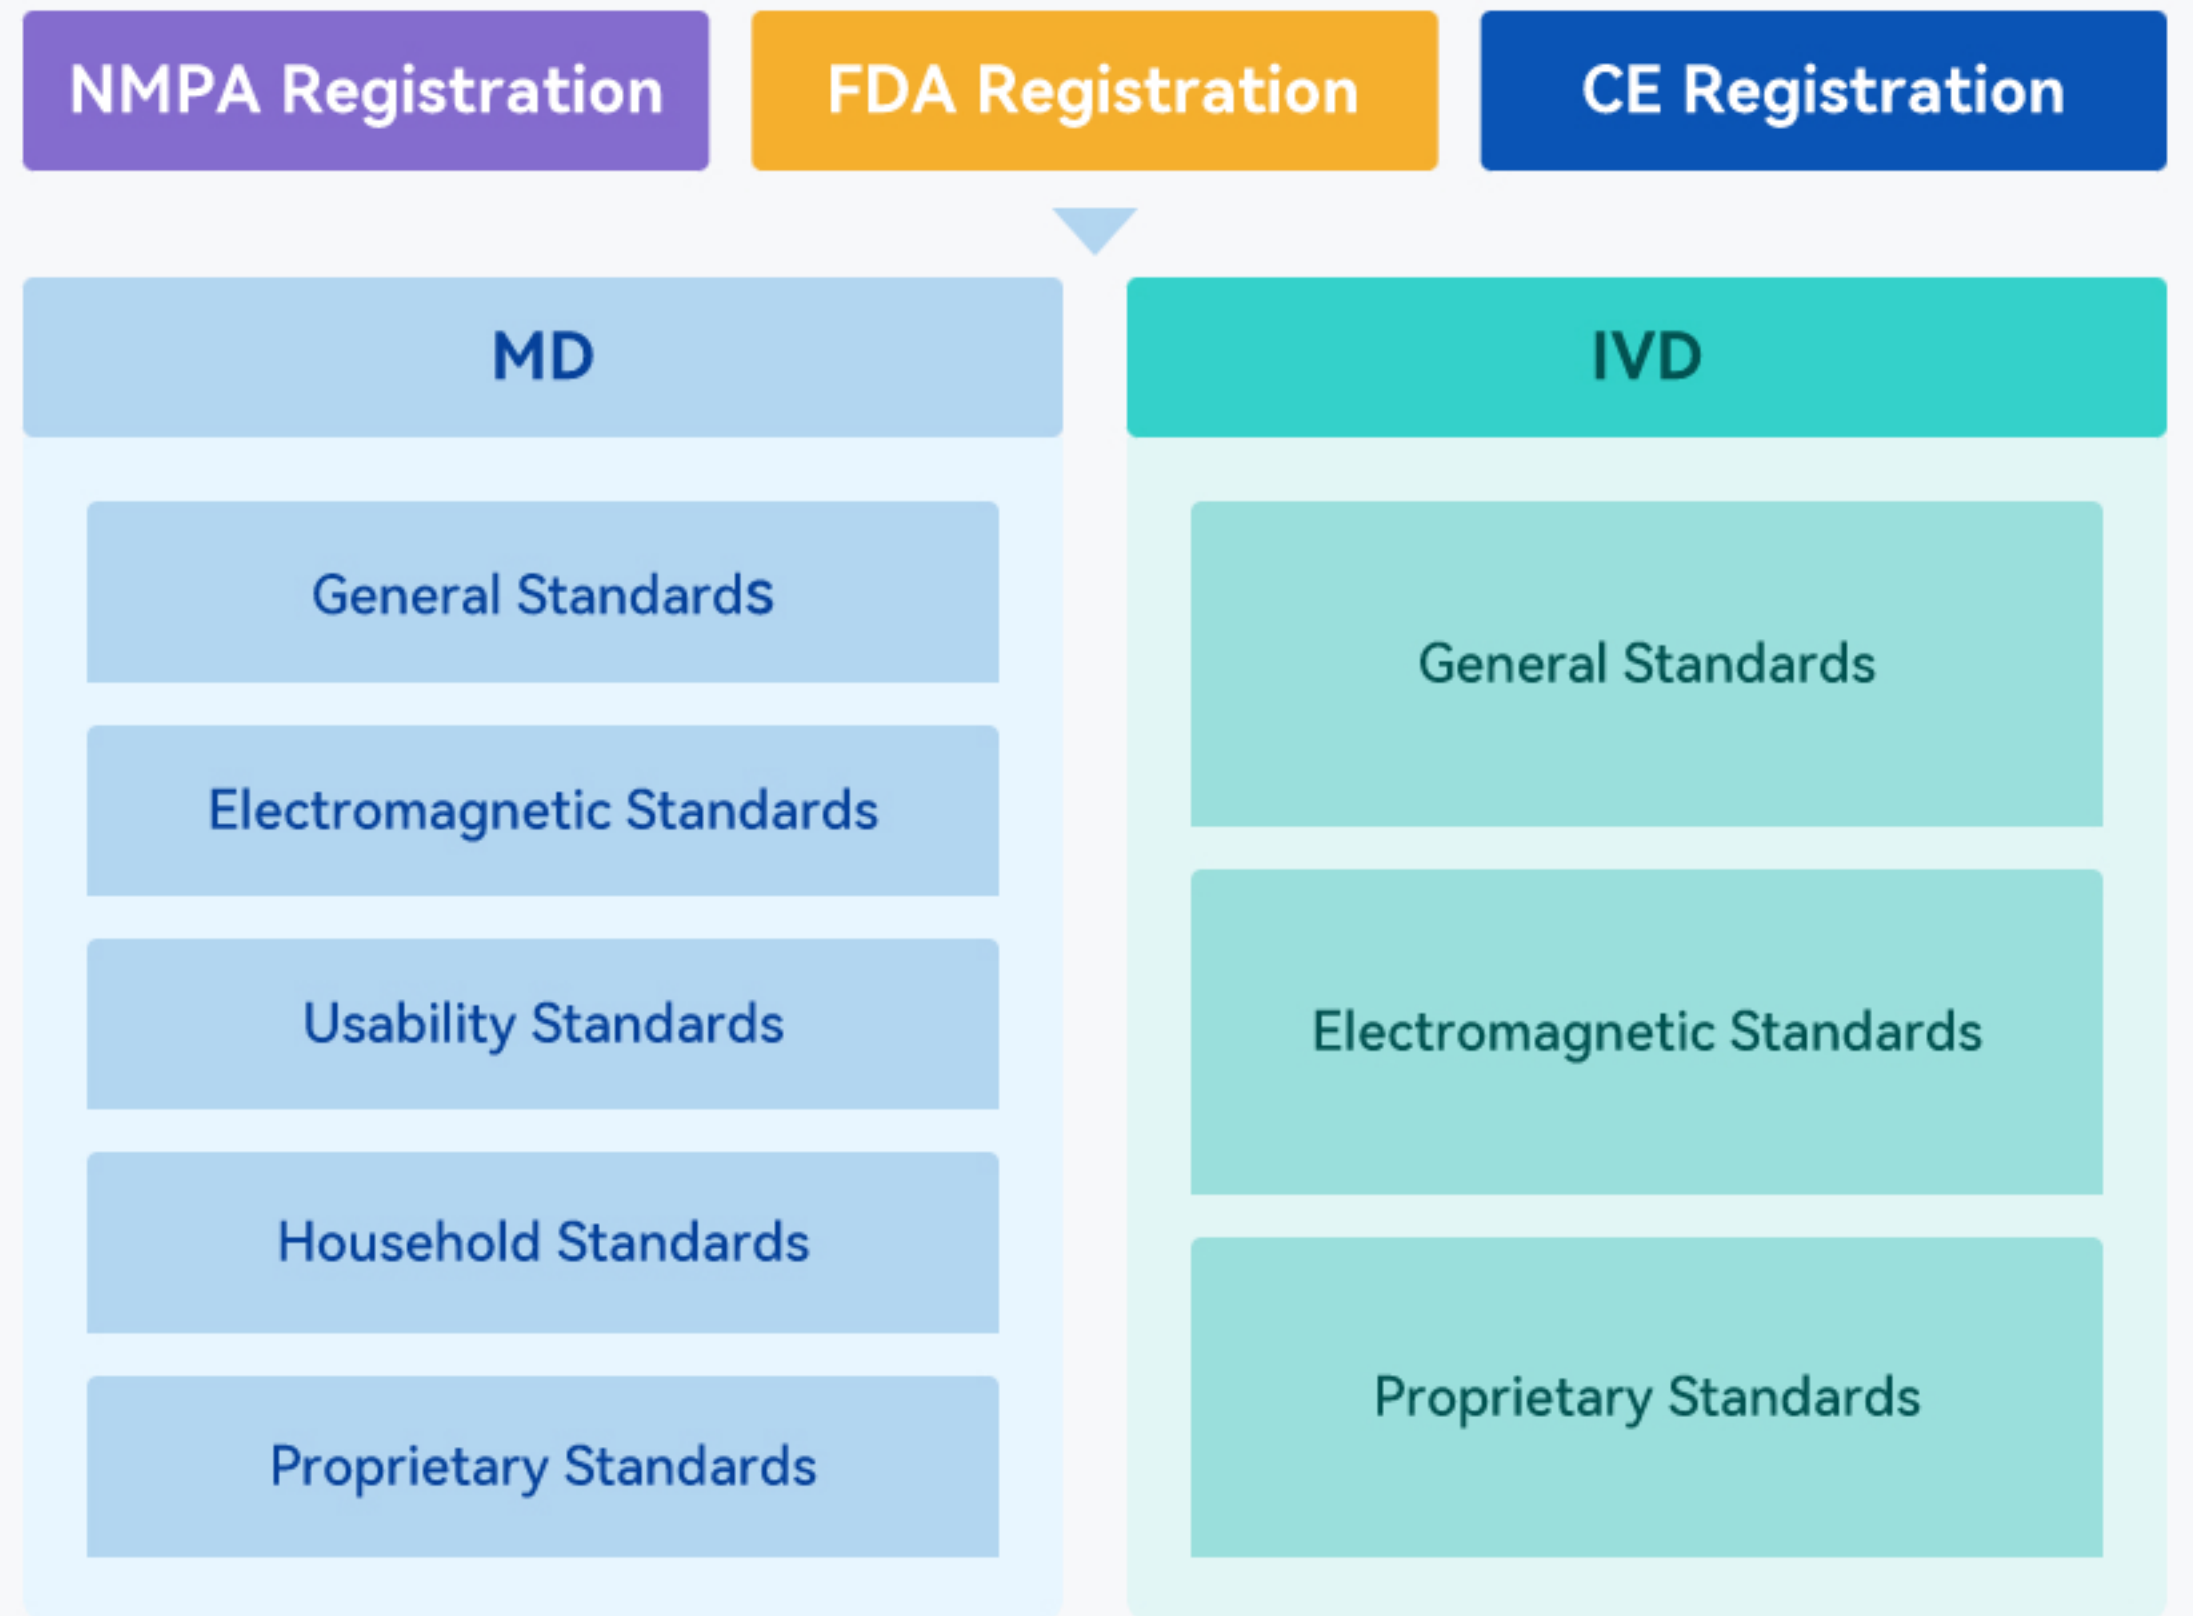

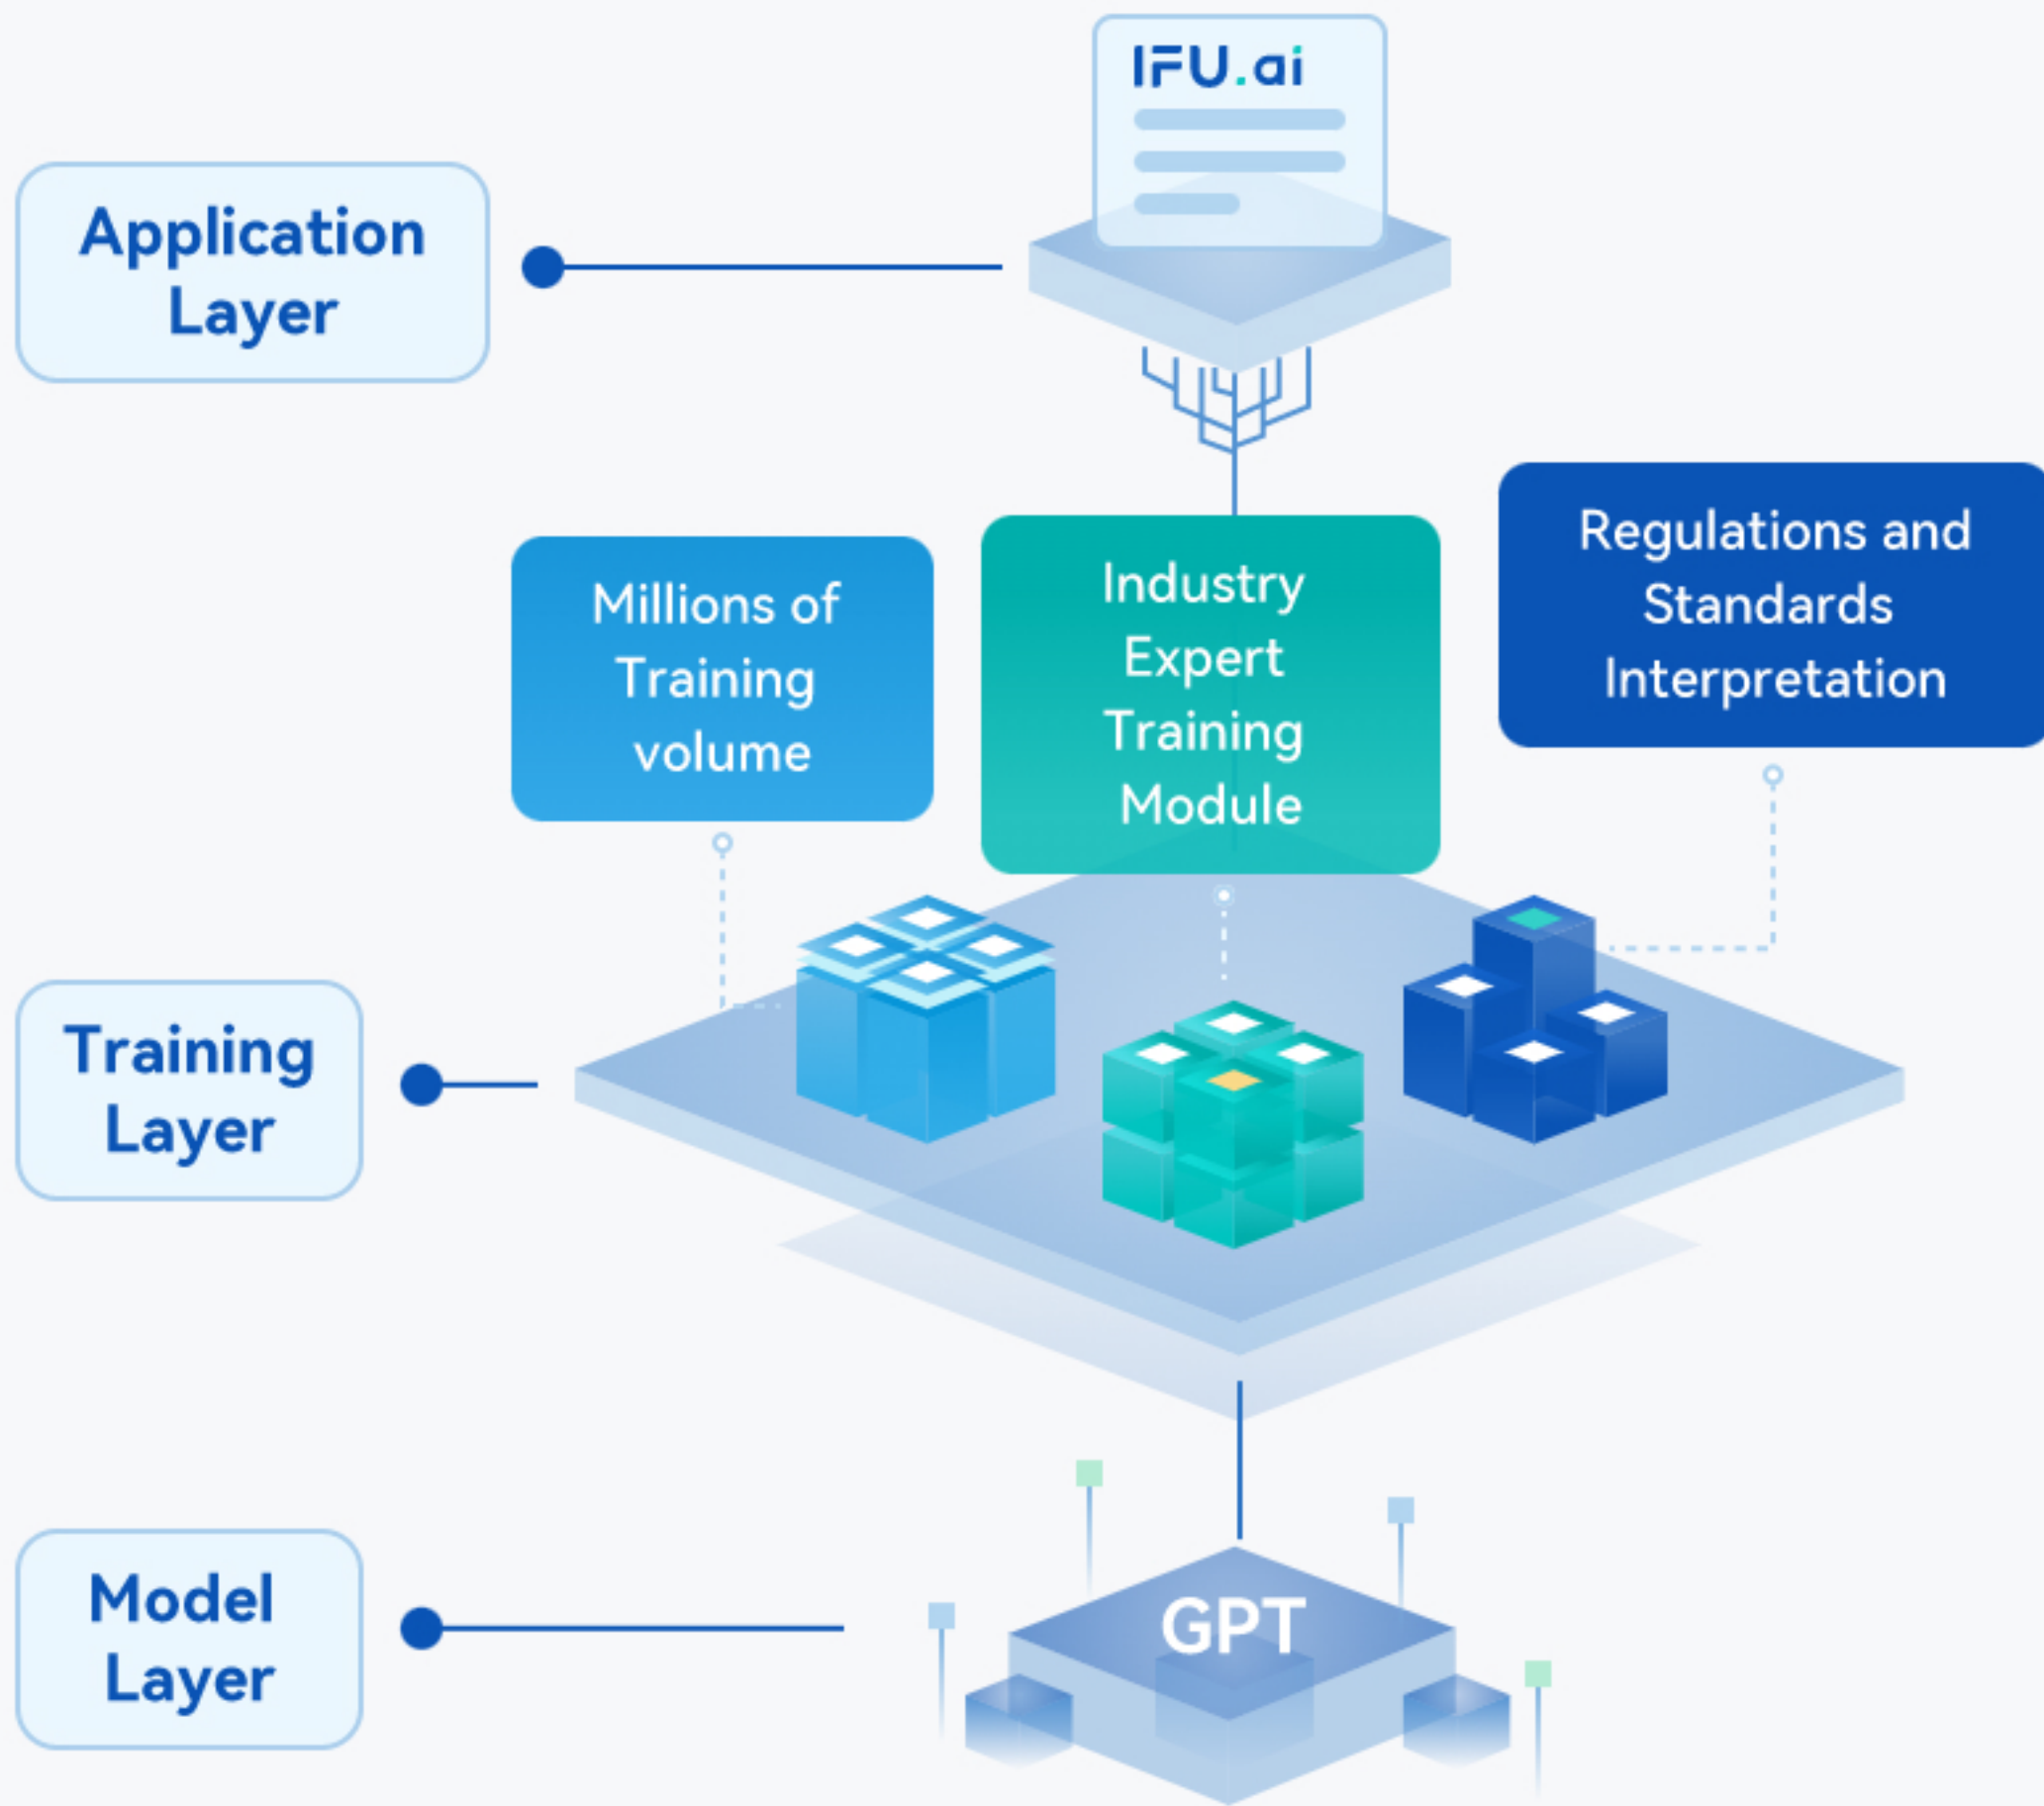

#### Impact on Consumer Reading Comprehension

Effective consumer communication relies heavily on product specifications as it is the sole means of the interaction between manufacturers and end consumers.

Take CE registration as an example

Traditional User Manuals Often Take **2-3 Months** to Finalize

## IFU.ai Accelerated Manual Writing

- Comprehensive Standards Coverage
- Ultra-Fast Generation Speed
- Convenient Automatic Typesetting
- Precise Literature Search

## Recognized by Microsoft, Groundbreaking AIGC Application

In the DIA China Digital Clinical Trials Innovation Forum held in Suzhou on April 21, Microsoft China adopted IFU.ai as the only AIGC solution case in the healthcare industry in its sharing PPT
