

iGlobe iPlanner Pro on Outlook and Teams

User FAQ

What is iPlanner Pro?

Are you tired of tracking tasks across numerous apps? iPlanner Pro is an application that extends the functionality of Microsoft Planner to Outlook and Teams. With iPlanner Pro, managers can enhance efficiency and productivity for themselves and their teams by utilizing Microsoft Planner in everyday tasks.

Why iGlobe?

iGlobe designs apps to help organizations get more out of Microsoft 365. Our apps help break down communication and application barriers, strengthen teamwork, and drive productivity while being secure and compliant. We also design our apps to be easy to install and use: As we like to say, "One click will do the trick."

Who benefits from iPlanner Pro?

iPlanner Pro is a perfect fit for anyone managing teams. Whether you're overseeing a team of nurses or managing a marketing department, iPlanner Pro makes it easy to track and manage tasks at an individual or team level.

What are the key challenges iPlanner Pro solves?

- Organization are using more and more apps
- Emails and Teams channels are often disconnected from task management tools
- It can be difficult to track progress and time spent on tasks

How do you benefit from iPlanner Pro on Microsoft Azure?

By extending the functionality of Microsoft Planner to Outlook and Teams, you can:

- Communicate and collaborate more effectively with your team members, stakeholders, and clients
- Easily create, manage, and update tasks using Teams and Copilot
- Save emails and attachments to tasks directly from Outlook
- Share important details like due dates, status, checklists, labels, and file attachments
- Track time for your Microsoft Planner tasks

Why is iPlanner Pro better on Microsoft 365 and Azure?

As a Microsoft 365 Certified App, iPlanner Pro has been reviewed by Microsoft against industry standards for security, compliance, and data handling practices. For customers with a Microsoft Azure Consumption Commitment (MACC), you can also draw down your MACC when you procure iPlanner Pro.

What Microsoft services and technologies does iPlanner Pro leverage?

- Microsoft Planner
- Outlook
- Teams
