

Overcome AI governance challenges

AI has become a central part of many businesses, optimizing processes, services, and products. However, many AI initiatives stall or fail due to concerns related to two key governance challenges:

1. PROTECTING DATA USED BY AI

2. ALIGNING AI USAGE WITH COMPANY ETHICS & REGULATIONS

2021.AI AGS solves both challenges.

AGS offers **you**

With 2021.AI's AGS, you get a model registry, tools for risk classification, an impact assessment framework, automated compliance checks that gate model releases, and a digital trace that constantly monitors whether your models perform in line with your guidelines and regulations.

AGS integrates directly into any AI Development and Operations Lifecycle

. This seamless integration simplifies AI governance, empowering you to **realize your full AI potential**.

AGS implemented in AI Model Lifecycle
