PROBLEMS

- 20% of Swedish doctors' **time** spent on documentation.
- Patient journals have **data quality** issues.
- 57% of healthcare providers report documentation **burnout**.
- Doctors' excessive focus on note-taking hinders effective **patient engagement**.
- Negatively-impacted **healthcare capacity**.

SOLUTION

- **Quick results**, in a few seconds.
- **Data privacy** – no data is stored in our servers.
- **Data quality** – by leveraging cutting edge AI integration.
- **Language support** - Svenska, English, Español, عربي
- **Capacity increase** – by saving doctors' time.
- Web interface for enabling **portability & compatibility**.
- **Integration** possibility with EHR/EMR software.

Our Mission

Enhance efficiency and accuracy in critical sectors by integrating advanced AI solutions. We aim to unlock new possibilities for process optimization, reduce the margin for human error, and enable professionals to focus on more strategic and creative tasks.

Our Vision

Pioneer critical industries transformation with AI, empowering a future of intelligent decision-making and sustainable progress, for contributing to the prosperity of the global community.
