

BENTO
INTELLECTUALLY CURIOUS

Mobile Device Mangement

2022

We love a challenge! We are young and dynamic, but also strong in industry specific know-how with lots of experience in Utilities, Field Services, Media, Food Manufacturing, Agriculture, Production, Industrial Engineering, IoT and more.

Bento is a leading software development and IT service provider and a top player in the Romanian IT industry. Our company is dedicated to deploying exceptional software solutions and to providing comprehensive IT services.

For over 17 years we have been building strong expertise in software design and IT system integration, working with organizations of all sizes in Romania, but also Austria and the USA.

In each project we act both as a consultant, in an effort to get a detailed understanding of the operational flow of our clients, and as a service provider for software development and IT services.

BENTO Mobile Device Management

Set your mobile devices on Autopilot!

WHY CHOOSE A MDM SOLUTION?

Provides an easy way to manage and secure mobile devices within organizations!

ISSUES:

- ✓ Difficulties updating all mobile devices at once
- ✓ The management and monitoring of the status of mobile devices is performed only at the headquarters
- ✓ Backing up and restoring data centrally from all mobile devices is difficult
- ✓ In case of loss or theft of mobile devices, remote disconnection from the network can not be done, the company being exposed to security breaches
- ✓ Lack of alignment between business and IT priorities

WHY BENTO MDM?

Automates configuration of mobile devices within the company and helps you get rid of their permanent care administration!

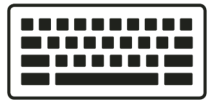

- ✓ It is a device fleet management solution for companies that use devices running Android, iOS, Windows, Linux applications
- ✓ Allows remote administration and configuration of mobile devices
- ✓ Limit the use of mobile devices other than as originally intended, internally
- ✓ Works both online and offline, data synchronization is achieved as soon as it is reintroduced into the network

BENTO MDM BENEFITS

Administrare – Monitor – Secure - Optimize

Automate and easy management

Kiosk, COPE or BYOD working profiles have the role to restrict user access, allowing centralized and automated administration of applications and features

Control & Monitoring

Audit the operation in the optimal parameters (CPU, RAM, storage, data traffic, battery, temperature, etc.) of the devices

Advanced Security

Mobile devices are protected from data leakage and unauthorized access by remotely locking and deleting them in case of loss or theft

Costs optimization

Reducing the costs generated by the management, maintenance and security of mobile devices in the company's fleet

BENTO MDM MODULES

Management Platform

The "office" component – an unified console to manage and track all different assets

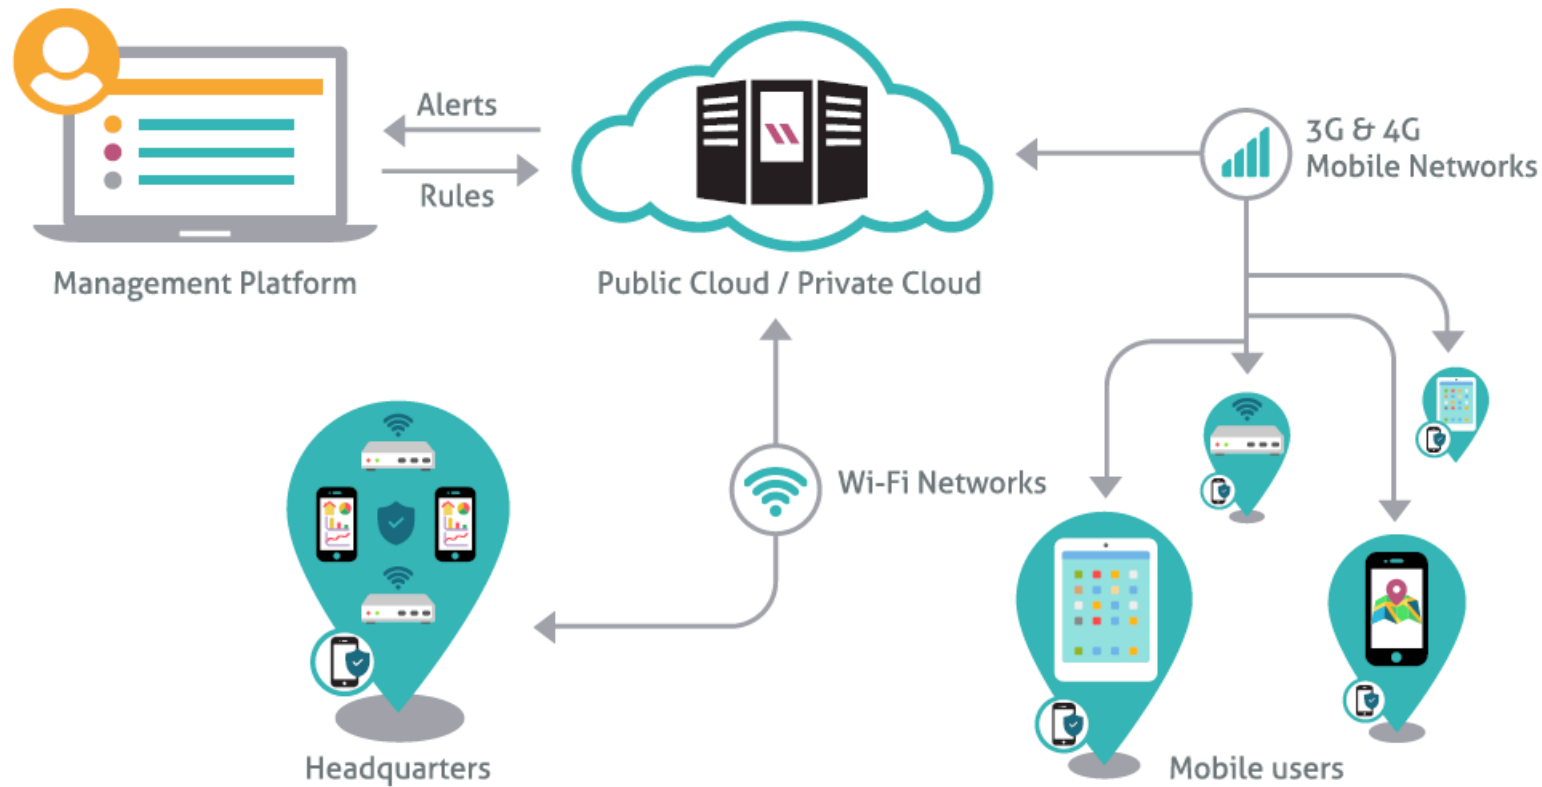

Mobile Application

The enforcer on the field running silently on devices

BENTO MDM FLOW

MANAGEMENT PLATFORM

- ✓ **OTA (Over The Air)** enrollment by simply scanning a QR code
- ✓ **Automatically** device configuration based on profiles
- ✓ **360-degree view** of all devices configured in the system
- ✓ **Mobile Application management** – adding or deleting devices
- ✓ **Content management** for mobile devices
- ✓ Security enforcing of devices against unauthorized access, remote blocking and deletion in case of loss or theft
- ✓ Centralized user management and access security
- ✓ Remote device management
- ✓ Audit and tracking reporting
- ✓ Deployment of restrictive user experience

MOBILE APPLICATION

- ✓ **Automatic synchronization of offline data when the app goes online**
- ✓ **Kiosk / COPE/ BYOD model** – as imposed at company level
- ✓ Update management of OS patches, Apps and system features
- ✓ **Displaying only internally approved applications and functions** (WIFI, camera, flashlight, computer, GPS activation, etc.)
- ✓ Restriction of user access OS and UI elements
- ✓ **Simplified management** of Bento MDM application version updates
- ✓ **Restricting user access** to the iOS, Android or Windows OS menu and settings
