

SERVICES

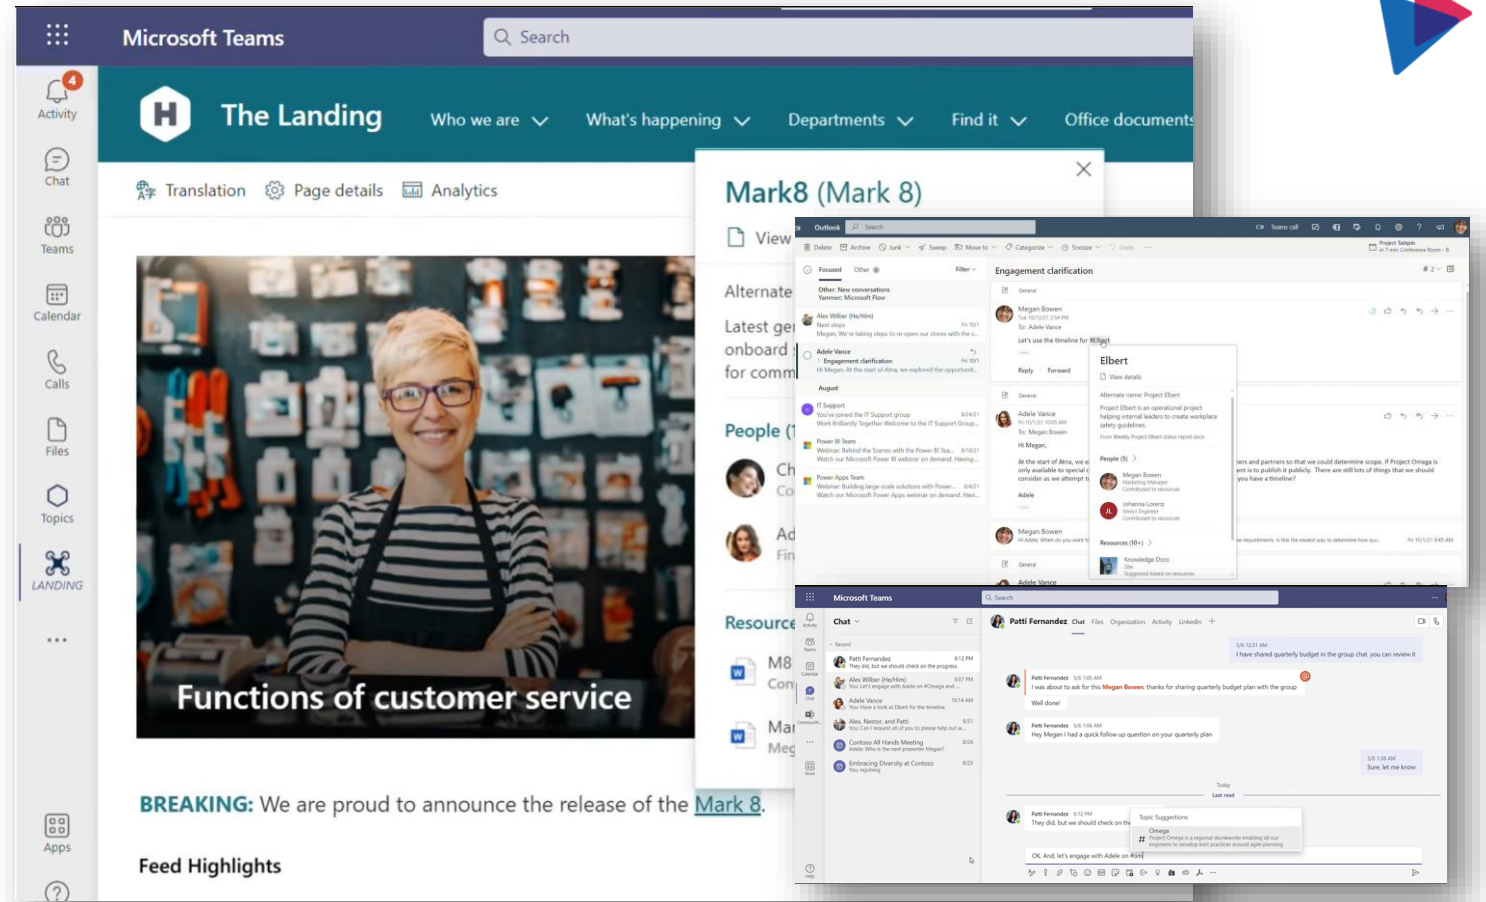

Bring The Intranet To Users Where They Work

While it's important to start with bringing the Intranet experience into Teams with Viva Connections, you can also bring the Intranet into context where people work whether that be in their inbox, IM messages, Yammer, or in the office applications like Word.

Estimated Duration:

Educate & Plan For Viva Connections & Topics

Implement Connections & Explore Topics

Empower Connections & Integrated Experiences With The Intranet

SERVICES

Bring The Intranet To Users Where They Work

WHAT WILL WE DO?

Our team of Intranet award winning talent, Intranet keynote speakers, Microsoft MVPs and industry experts will educate your Intranet teams on how Microsoft 365, Viva Connections & Viva Topics can bring the Intranet to users where they work.

We will help your organization plan an effective pilot of Viva Topics aligned with your own Intranet, departmental and content leads to ensure initial topics can be curated effectively and responsibly.

Together we will enable new employee experiences with Viva Connections and Viva Topics.

We will support initial trialing and piloting of topics that bring the Intranet and the organizations information to users where they work in Outlook, Teams, Yammer, Word, SharePoint and more.

Customized implementation plans are available for purchase.
