Tasks	Card link to apps only		

No code   Low code   Custom

Educate & Plan For Viva Connections Extension

Implement Connections Dashboard Cards

Empower Connections & Integrated Experiences

Extending The Employee Dashboard

WHAT WILL WE DO?

Together we will review the possibilities and opportunities custom dashboard cards provide and align organization and user needs.

Our team will design and document (including wireframes) the card(s) to be developed based on industry best practices.

The new card designs will be created using Teams, SharePoint, or custom development techniques. They will be tested and deployed in a QA tenant environment.

We will deploy the ready for release cards into production for user acceptance testing, configuration/optimization and piloting.

Our team will help support the launch of these new cards and their effective adoption.

Customized implementation plans are available for purchase.
