airia

Smart, Secure AI for the *Modern Legal World*

Securely Build, Deploy, and Manage Legal AI at Scale

The Airia AI Platform for Legal is built for the modern practice—designed to accelerate adoption and streamline workflows without disrupting the way legal teams work. With tools to build, deploy, and manage AI solutions at scale, Airia helps legal and corporate teams improve efficiency while meeting strict regulatory and ethical standards. Whether optimizing operations or enhancing case strategy, Airia enables you to integrate AI with confidence and deliver high-quality legal services.

- Boost lawyer and staff productivity with AI assistants

- Reduce operational costs and improve practice efficiencies

- Streamline documentation workflows with AI automation

- Enhance client service with personalized case management

- Secure privileged information with robust compliance policies

Transform Legal Workflows with Purpose-Built AI Assistants

LAW FIRMS	IN-HOUSE COUNSEL	LEGAL OPERATIONS	BUSINESS USERS
Draft & Review Contracts	Review Contracts	Client Intake	Enterprise Search
Summarize Documents	Trademark & IP Filings	KPI & Benchmark Reports	Employment Law Policies
Redline Agreements	NDAs & Standard Agreements	Forecasting & Allocation	Self-Service Assistants
Knowledge Search	M&A Due Dilligence	Vendor Management	Marketing Compliance
Litigation Document Automation	Outside Counsel Management	Onboarding & Enablement	Policy Compliance Audits

Key Platform *Capabilities*

⊙ AI-Powered Assistants

DRAFT DOCUMENTS: Speed up deals with AI-powered document creation using approved templates and firm standards.

LEGAL RESEARCH: Streamline case prep with AI search across multiple data sources and file types.

CONTRACT ANALYSIS: Review contracts with AI to spot key terms and risks while checking compliance with your playbook.

NATURAL LANGUAGE: Work more efficiently with AI that understands legal terms and provides guidance in plain English.

⧉ Agentic Workflows

CUSTOM LEGAL AGENTS: Build and deploy AI workflows tailored to your firm's unique needs, from due diligence to contracts.

GUIDED TASK LISTS: Follow a prescriptive list to complete a task instead of complex prompting.

REAL-TIME DATA: Connect AI agents securely to your document databases and legal tools for real-time access.

EXISTING WORKFLOWS INTEGRATION: Embed AI capabilities directly into current tools to minimize disruption to processes and workflows.

ROUTING OPTIMIZATION: Direct AI requests to models based on matter type, sensitivity, cost or model performance.

🔍 Knowledge Management Integrations

WORD INTEGRATION: Enhance document creation with legal drafting and review tools built directly into Microsoft Word.

INTERNAL REPOSITORIES: Connect securely to your document management systems, enabling AI analyze and extract insights.

ENTERPRISE APPS: Seamlessly integrate with your work tools, including Outlook, Teams, Slack, and Google Workspace.

CITATION MANAGEMENT: Ensure accuracy with smart citation generation that automatically formats and validates references.

TRANSLATION SERVICES: Break down language barriers using specialized legal language models and terminology databases.

🔒 Security & Governance

DATA PROTECTION: Safeguard client data with robust security, including encryption, DLP, and privacy tools.

RESPONSIBLE USE: Ensure AI activities follow firm policies and regulations with automatic detection of potential violations.

ACCESS CONTROLS: Deploy role-based permissions that align with organization structure and client confidentiality needs.

AI MODEL GOVERNANCE: Enforce strict review processes to verify all AI capabilities meet firm standards before deployment.

AUDIT FEATURES: Track all AI activity with detailed logs of prompts, outputs, and user actions for compliance monitoring.

ENTERPRISE COMPLIANCE: Meet enterprise security standards with SOC 2 Type II, ISO 27001, GDPR, and HIPAA certifications.
