

Plan your integration modernisation with our BizTalk to Azure Migration Assessment

We help you understand the costs, benefits and effort involved in modernising your integration technology into the cloud.

Why migrate?

Mainstream support for BizTalk Server 2020 ends in 2028; all other versions are already out of support. Some technology assets such as .Net and SQL may be out of support sooner. Modernizing onto the Azure platform is the best option, allowing you to reuse existing BizTalk assets.

Problems you might have

- ✓ Uncertainty about migration duration and costs
- ✓ Lack of documentation and in-house skills
- ✓ Need for risk management with business-critical applications
- ✓ Limited team capacity and focus on other areas

Your best solution

Work with the #1 Integration Partner for a comprehensive **BizTalk to Azure Migration Assessment**, detailing size, complexity, costs, and risks. We have the UK's strongest team of BizTalk and Azure experts and are best placed to help you plan for success.

What you get

Consultation Onsite or Teams meeting with a BizTalk migration expert	Report Summary of your BizTalk estate, and assets, risk & complexity score
Backlog We build a detailed, costed migration development backlog	Feedback Presentation of findings and Q&A with your team

Benefits

Clarity Clear understanding of migration project scope and complexity	Planning Reliable data for planning and budgeting
Risk Management Proactively manage obsolescence of your technology platform	Reuse Identify the components that can be reused in your migration

How it works

Workshop Gather context on your BizTalk applications	Analysis Analyse your BizTalk assets using our custom tools
Report Detailed analysis and report generation	Presentation Share findings and key insights

Costs and timescales

Timescale Typically completed in about a week	Price From £4,950 for up to 10 BizTalk applications in one BizTalk Group
Options Option to include an Azure proof of concept	Funding Funding may be available depending on your status
