

# CAD

Powered by  
VELOCITY™

## THE LEAST CLICKS FROM CALL TO DISPO

**PinPoint™ Location Finder** Get the precise geo-location even when there's no defined address.

**Single-Click Dispatch** auto-recommends units based on multiple criteria to enable fastest dispatch in the industry.

**RapidSOS Integration** delivers life-saving data from 400M+ devices.

**Built-In NCIC Lookup** delivers critical background intel without switching screens.

**Real-Time Video Feeds**, 3-D maps and ESRI Layers provide a 360° visual of the situation.

**Offline Mode** Continue taking calls even without network connection, add incident details & comments.

**Rich Response Plans** based on GIS area, unit type, equipment, skills, etc.

**RMS Integration** transfers incident details directly from CAD to reports.

# TRULY MOBILE

Industry leading mobile app **extends CAD to iPhone & Android** phones & devices

Receive **live video feeds**, alerts & community tips

Velocity™ alerts **proactively ready officers** for impending calls

**Optimized routes** with in-app navigation

## Intuitive & Easy-to-Use

Get trained in hours, not days. Use touch, commands and sensors to act fast.

## Cloud Enabled + Purpose Built

Zero downtime, No servers, No VPN, and No new passwords to remember.

## Mobile

View alerts and intel on smartphones or tablets for true real-time response.

## Interoperable

Out-of-the-box connectivity with RMS, RapidSOS, Bodycams, AVLs + more.

## Powered by Artificial Intelligence

Velocity™ technology & smart workflows enable lightning-fast dispatch.

## Rapidly Deployable

Go-live in weeks, not years. Downloadable app starts Day 1.
