Azure Economic Assessment
Cost-effectively make the move to Azure

3Cloud

Microsoft Gold Partner

Cloud migration and the implementation of your cloud strategy is not just about the technology, it's about complex decisions and prioritizations based on business objectives, people, and processes, as well as managing risks.

The 3Cloud Azure Economic Assessment delivers data-driven insights for Azure migration, including an economic analysis, application prioritization, and reference architecture.

Our Assessment leverages Movere, Azure Migrate or another appropriate discovery tool to survey your environment, map dependencies, aggregate findings, uncover analytics, and apply advanced AI/ML models to generate cloud optimization recommendations along with proven economic forecasting.

We then use our proprietary **3Cloud 360** tool to give you a seamless and interactive dashboard that lets you dive into the details of our optimization recommendations and cost estimates, including the ability to drill down on individual applications, environments, data centers and more.
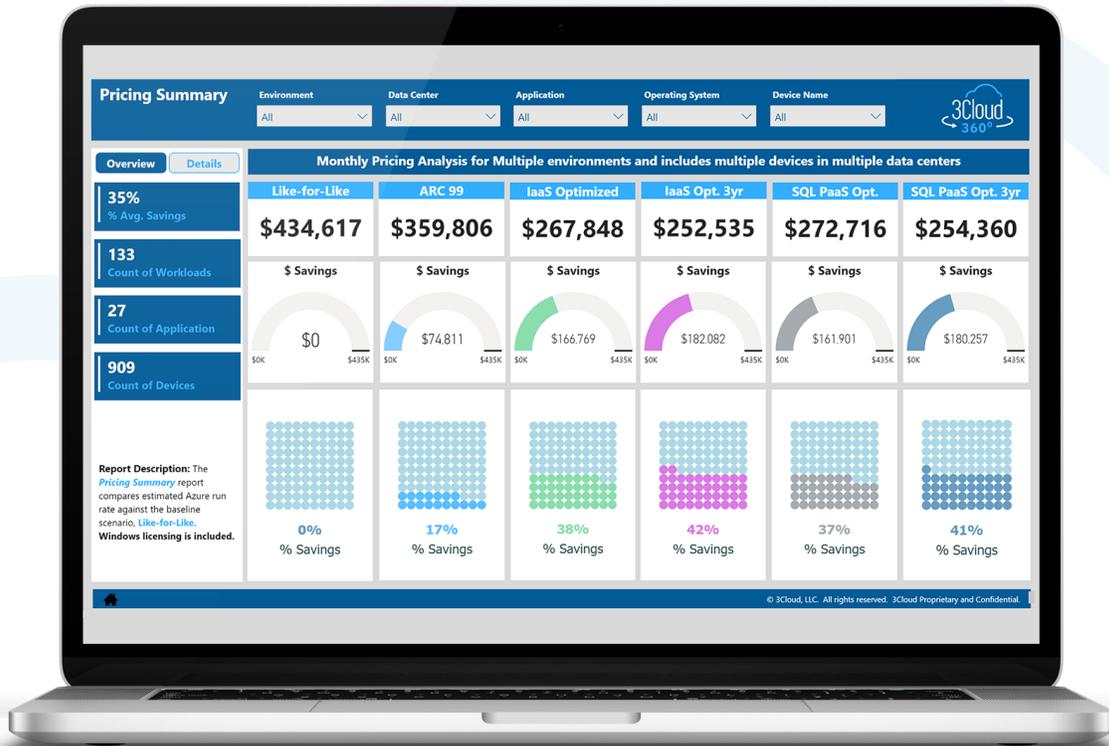

Azure Economic Assessment Outline

- Discovery

- Data Collection

- Client Feedback

- Workshop / Feedback Review

- Analysis

- Final readout and recommended next steps (3Cloud proposal)

Equipped with the data scan information, server survey and workshop insights, we will use our proprietary pricing and optimization models to provide you with a series of Azure pricing scenarios, along with a recommendation on how to move to Azure most cost-effectively.

After the Azure Economic Assessment, your organization will be well positioned to quickly begin migrating your environment into Azure. There are no surprises, because the 3Cloud assessment team shares all the learnings from the assessment with our migration delivery team, empowering you to transition seamlessly into your new cloud environment.

Even if cloud migration isn't an immediate next step, the analytics portal, licensing analysis, and dependency mappings will provide invaluable insight for your organization at the conclusion of the assessment.

If you're ready to start planning your cloud migration, we can help.
