

Azure Foundation

Accelerate Your Migration to Azure

Azure Foundation is the ideal solution for organizations who need to accelerate their Azure adoption.

We can help you create a highly automated, connected, secure and scalable environment with cost management, baseline security, monitoring, customizable guardrails, and policy-driven governance.

Based on our experience across hundreds of clients, proven best practices, and automation IP, Azure Foundation creates a baseline for an organized, discoverable and scalable Azure environment:

Support both IaaS and PaaS workloads

Host production and non-production environments

Leverage built-in governance, security and scalability

Easily plug in Azure solutions for applications, data and analytics

Achieve proper spend management and managed services

Azure Foundation Deployment Engagement

Collaborative Discovery Workshops

Align on your goals and understand your needs in a series of virtual workshops

Design and Documentation

Create foundation drawings, establish governance policies, and document standards

Deployment

Deploy the foundation into your environment using our automation IP

Knowledge Transfer

Review the delivered foundation and documentation and finalize handover to your team

Azure Foundation Add-On Modules

3Cloud's Azure Foundation is designed to accelerate you into Azure in a scalable, secure and well governed way, while also being modular so you can select the elements you need to support your primary business need.

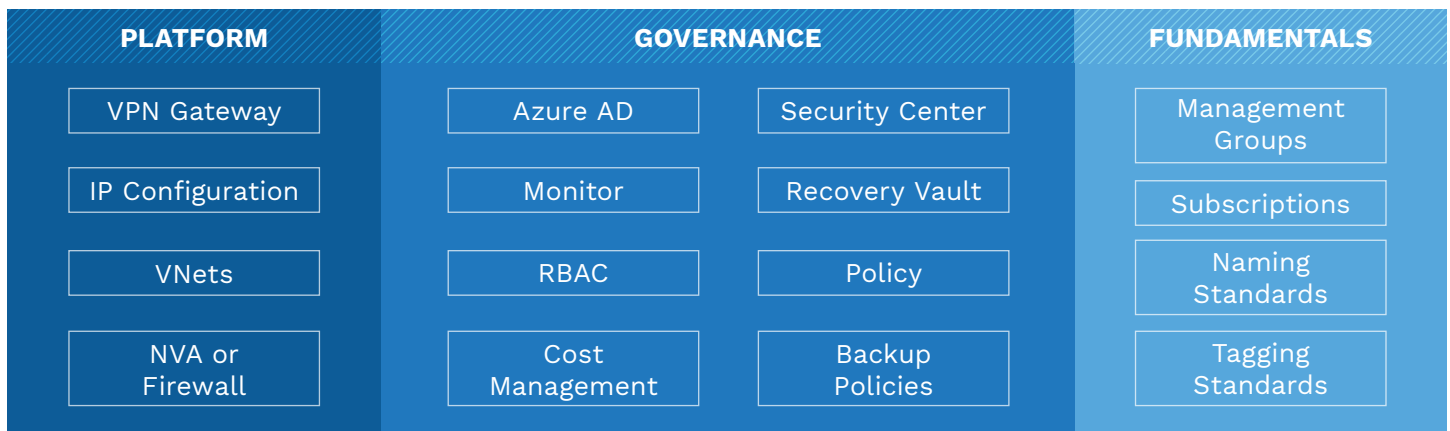

Choose from additional modules to augment the Azure Foundation baseline configuration, including:

- 3Cloud Azure Advisor
- 3Cloud Shoulder to Shoulder Deployment
- NVA Firewall Configuration
- Advanced Monitoring
- Active Directory Domain Extension into Azure
- DR Discovery and Planning
- Advanced Custom IAM with RBAC Requirements
- Azure Security Advisor
- Azure Infrastructure as Code Jumpstart
