

Lift & Shift to the Cloud

Fast, painless migrations from on premise to the Azure platform.

Migrate your existing development, test or production environments from VMWare or Hyper-V to Microsoft Azure IaaS based on standard Microsoft solutions.

By using the latest Microsoft technologies, it is not necessary to rebuild environments in the cloud. This can be copied directly without inconvenience.

What is "Lift & Shift to the Cloud"?

Simplify the migration of your applications. 3fifty is able to create consistent synchronization points that allow even the most complex applications to be migrated to the Microsoft Azure platform in a simple and efficient manner.

Why customers use Lift & Shift

This at-a-glance box

- Data center consolidation

- Decreasing Capex costs

Focus more on innovation

3fifty has supported NXP with their Lift and Shift solution. The working method enabled them to move the entire Azure Classic environment to Azure Resource Manager in the short term. They have achieved this with minimal downtime. During the project they also carried out an optimization to create more overview.

Erik Janssens, Cloud Architect, NXP Semiconductors
