ABOUT 4IT SOLUTIONS

Since 2008 4IT Solutions have been providing high-profile IT solutions to companies in the public and private sector, establishing as one of the leading technology partners able to provide the right tools to successfully navigate the Digital Transformation. With extensive knowledge in IT infrastructures implementation and management, excellent support services and a wide range of managed services, we can work alongside to our clients to build effective and long-lasting relationships.

ABOUT BARRACUDA MANAGED FIREWALL

Modern cyber threats, such as ransomware, require high-level defense techniques and IT staff able to balance threat detection and fast response time. Sometimes it happens that, due to lack of skilled resources, time or budget, SME's underestimate the importance of a good protection, leaving the company perimeter exposed.

The Barracuda Managed CloudGen Firewall service enables companies to have a reliable network protection and team of highly skilled professionals who configure, monitor, and completely manage it, allowing the company to focus on its core business.

- No hardware upfront investment but a transparent monthly fee
- Deployment for single installation and for HA cluster

- Set-up and management of subsidiary companies based in a different nation from the HQ
- Data hosted in Azure data center based in Switzerland on Barracuda Firewall Control Center
