

Microsoft 365 Migration and Adoption

ABOUT 4MSTECH

4MStech is a service company, focused on Microsoft Cloud Infrastructure Solutions. We offer managed and adoption Microsoft 365 and Azure professional services and have experience on complex projects with clients from different segments.

WHAT DO WE OFFER?

Microsoft 365 migration and Adoption Services, enabling clients to use solution resources faster, with reduced costs and effort. Adoption is complementary to migration, with a focus on users and their needs, reducing barriers.

Thanks to our experience with similar projects and the PROSCI certification, which grants us excellence in Change Management, the effective adoption of Microsoft 365 is fast and the mapping of users' needs vs. resources is more complete.

Microsoft 365 is a complete productivity suite, enabling security and compliance, fully integrated, with modern desktop components and allowing companies to get the most out of their investment in collaboration and security.

Adoption and Change Management Processes and Methodologies are used in our projects, combined with the experience and advanced knowledge of Microsoft technologies.

WHAT OUR CLIENTS ARE SAYING

“With the implementation of Microsoft 365, we replaced several third-party products, increasing the security of our collaboration environment and obtaining a quick return on investment.”

– Alexandre Barella, IT Manager, Banco Modal

4MSTECH

Microsoft 365

Microsoft 365 is an ever-expanding suite of cloud services that helps your organization meet collaboration, communication and security challenges. Its security and compliance components are integrated with collaboration tools like no other manufacturer, which makes them essential today.

WHY MICROSOFT 365?

PREPARE FOR THE FUTURE

The continuous innovation of Microsoft 365, with frequent deliveries on short notice, is the current model of software production and is aligned with the modern vision of agile development. Our Microsoft 365 Migration and Adoption service accelerates implementation across a wide range of organizations and allows for a faster return on investment.

MODERNIZE YOUR DESKTOP

The Microsoft Managed Desktop provides users with modern devices that increase productivity and collaboration. The latest security, management and productivity tools are used, such as Windows 10, Microsoft 365, Azure AD, Intune, among others.

GET THE BENEFITS OF CHANGE MANAGEMENT

Successful adoption of new technologies requires changes in user behavior, which can be difficult to achieve. It takes more than just learning how to use a new application, it's a different way of working. This change is about people and our experience, together with the PROSCI certification, accelerates the migration and adoption of Microsoft 365.

TRUST THE MICROSOFT CLOUD

The support of a team of experts, as well as the trust of companies, governments and startups, guarantees security and proactive compliance from the beginning of the journey.

The security research and development processes, and the hiring of 3,500 cybersecurity specialists, counted on an investment of more than 1 billion dollars.
