4WARD, an Italian software vendor and Microsoft partner, developed a reporting and management system for Offi4WARD, an Italian software vendor and Microsoft partner, develops a reporting and management system for Office 365 and uses the Azure platform, integrated with MongoDB and Linux VM, to launch it internationally. It rapidly gained 500,000 managed users and is expecting more than two million within a year. As a result, the company has developed a global presence and international reputation for innovative services.
