

Transform in Weeks, Not Years.

Bridge is a GPU Management Solution that lets compute owners rapidly monetize market demand via GPU-as-a-Service or AI Platform Services

Value Proposition

Increase Compute
Revenue

Enterprise & Sovereignty
Secure

Resource Consumption
Flexibility

Full Lifecycle
Monitoring & Control

Multi-Tenancy
Hard Isolation

Single Click
Platform Services

Infrastructure Provisioning

- Automated discovery of infrastructure including cluster topology and individual server mapping
- Simplified workflows for onboarding & de-provisioning servers to reduce manual workflows
- Fully support Bare Metal, Virtual Machine, and Container Hosting
- Detailed network telemetry
- Define tenant server resource allocation, security group setup, and billing operations

Single Pane of AI Operations

- Launch on-demand instances and long-term cluster for GPUaaS with detailed billing & token consumption reporting
- Solve outcomes without resource management overhead (Model as a Service, Job Submission)
- Fully customizable interface & catalog applications for end customers to build deeper AI development
