

Common Data Platform

5Y Common Data Platform
Overview

We are here to help UK companies increase their resilience and adaptability in times of increasing change. We embrace new methods and leading innovations in technology, data access and market intelligence to enable companies to predict and react to changing market conditions - performing discrete transformation where it counts, when it counts.

Observe, Question, Hypothesize, Simulate, Transform

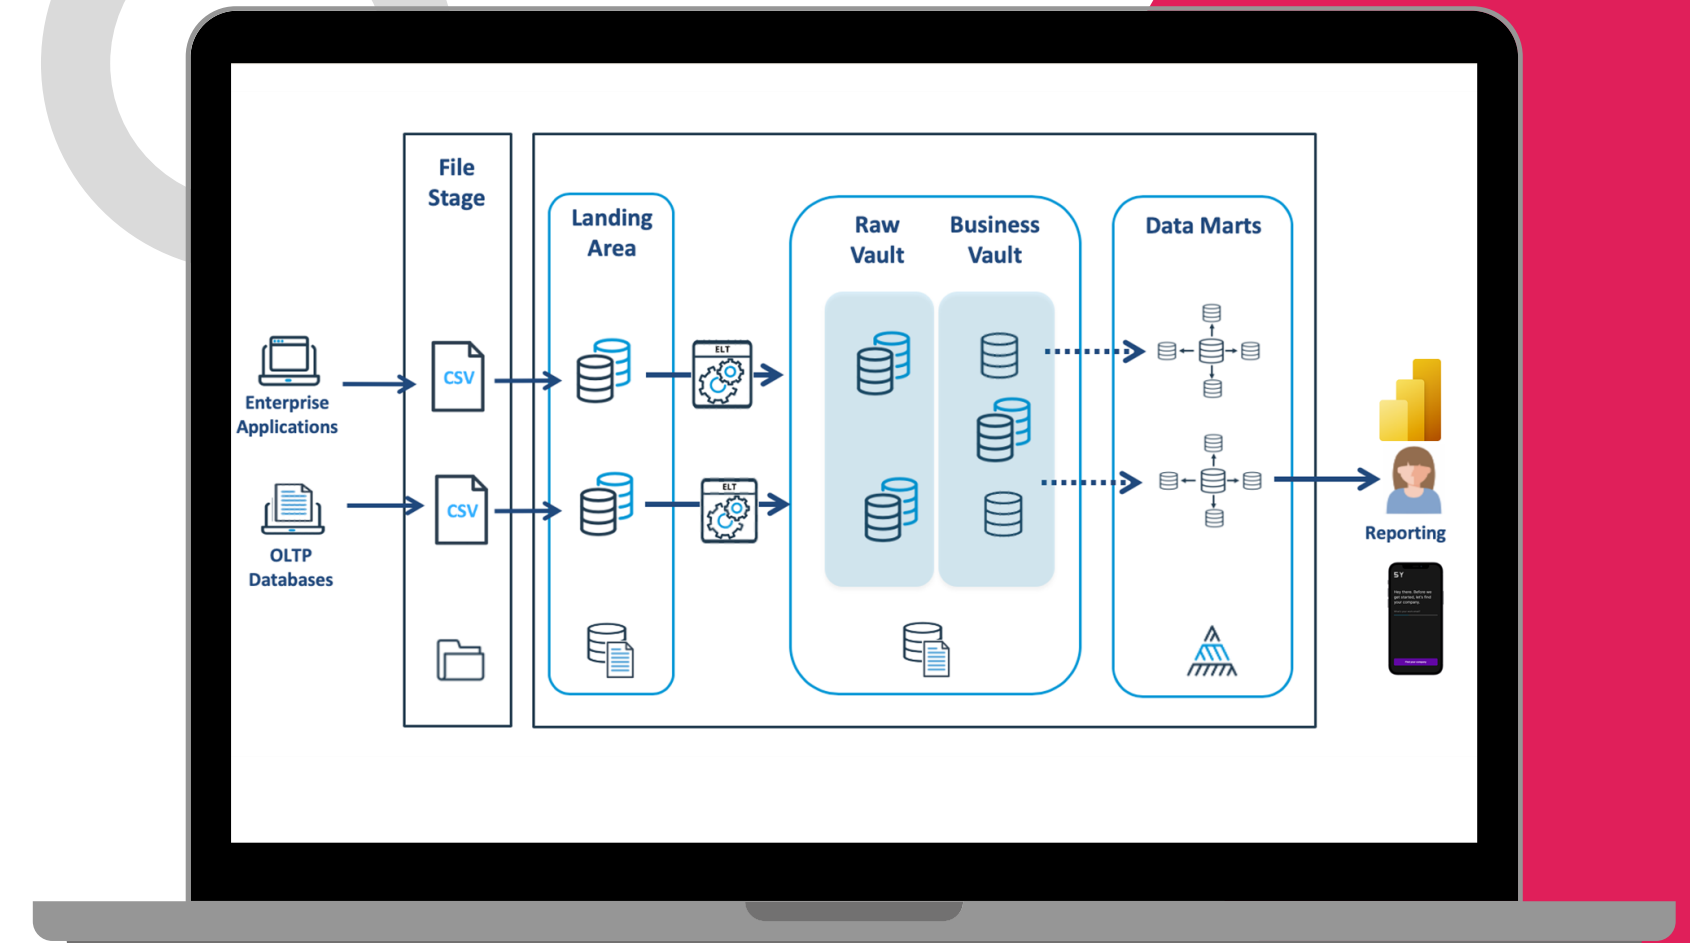

5Y Platform Architecture

HOW IT WORKS

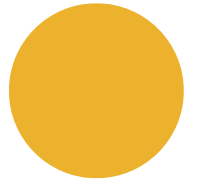

We utilize a vault-based structure which has a 3-tier architecture

Data Vault structures are designed to be agile, implemented incrementally and infinitely scalable. 5Y have built a standard data vault structure based on operations and the MSFT CDM for rapid implementation

Contact us

Book in a free 30 minute discovery call with our Head of Sales, Nigel, to see if we can help you accelerate your transformation with the 5Y platform.
