## How to backup Dropbox data?

Here is a step-by-step process to backup Dropbox data with this user-friendly and easy-to-use software:

**Step 1:** Launch **Kernel Cloud Backup** and click on **Dropbox** module from the home screen.

Step 6: In the Filters wizard, select necessary filters from:

- **Date Filters**: Select a date range from Start Date to End Date to extract data between these dates.
- File Filters: It allows you to extract specific files from the database.
  - **Exclude File Type**: Enter File type names, such as .doc, .xls, .pdf, etc., to skip from Dropbox back up.
  - **Include File Type**: Enter specific File types, including .doc, .xls, .pdf, and others to include in backup.
- Set an operation timeout for larger files while downloading: Select a time to extract larger files in the selected time.
- Version Filters: It will help you back up data of specific or different versions.
  - Include All Versions: It will back up all the versions of the specific files in the backup file.
  - **Include most recent versions**: Select the version numbers so the software can backup those recent versions and provide specific results.

Kernel Cloud Backup (AWS S3, Dropbox, Box, Azure Blob Storage, Salesforce)	×
Filters         Date Filters         File Modification Date         Start Date:       14 May 2025         End Date:       14 May 2025	
File Filters         File Type Masks         Exclude File Type:         Example: *.doc,*.xls,*.pdf         Include File Type:         Example: *.doc,*.xls,*.pdf	
Set an operation timeout for larger files while downloding 20 Min  Version Filters Include Versions Include All Versions Include most recent versions : 1 <back next=""></back>	Cancel

After applying filters, click **Next** to proceed with the backup process.

**Step 7:** Select destination from the given options:

- 1. Backup to local: Local storage or NAS Drive
- 2. Backup to Cloud: Amazon S3 or Azure Blob Storage

K.	Kernel Cloud Backup (AWS S3, Dropbox, Box, Azure Blob Storage, Salesforce)	×
	Destination Destination Type Backup to local	
	Icoal or NAS drive	_
	Backup to Cloud	
	O Amazon S3 O Azure Blob Storage	
	Backup Path	
	Please browse and select the location where you want to take backup	_
	Destination: Browse	
	< Back Next > Can	cel

**Step 8:** Click **Browse** and provide path to the select specific folder to save backup locally and click **OK**. You can also create a new folder to save the backup to an isolated location.

Step 9: Again, in the Destination section, click Next to initiate backup process.

Step 10: Select Execute Immediate and Schedule to set a timer for backup.

K	Kernel Cloud Backup (AWS S3, Dropbox, Box, Azure Blob Storage, Salesforce)	×
	Select schedule	
	Execute Immediate	
	O Schedule	
	Occurs once on Wednesday, May 14, 2025 at 04:22:19 PM	
	< Back Next > Cancel	

**Step 11:** Backup process has started. Click on **Project Name** and **Job Name** to view the backup process.
