# How to Use Kernel XPS Converter
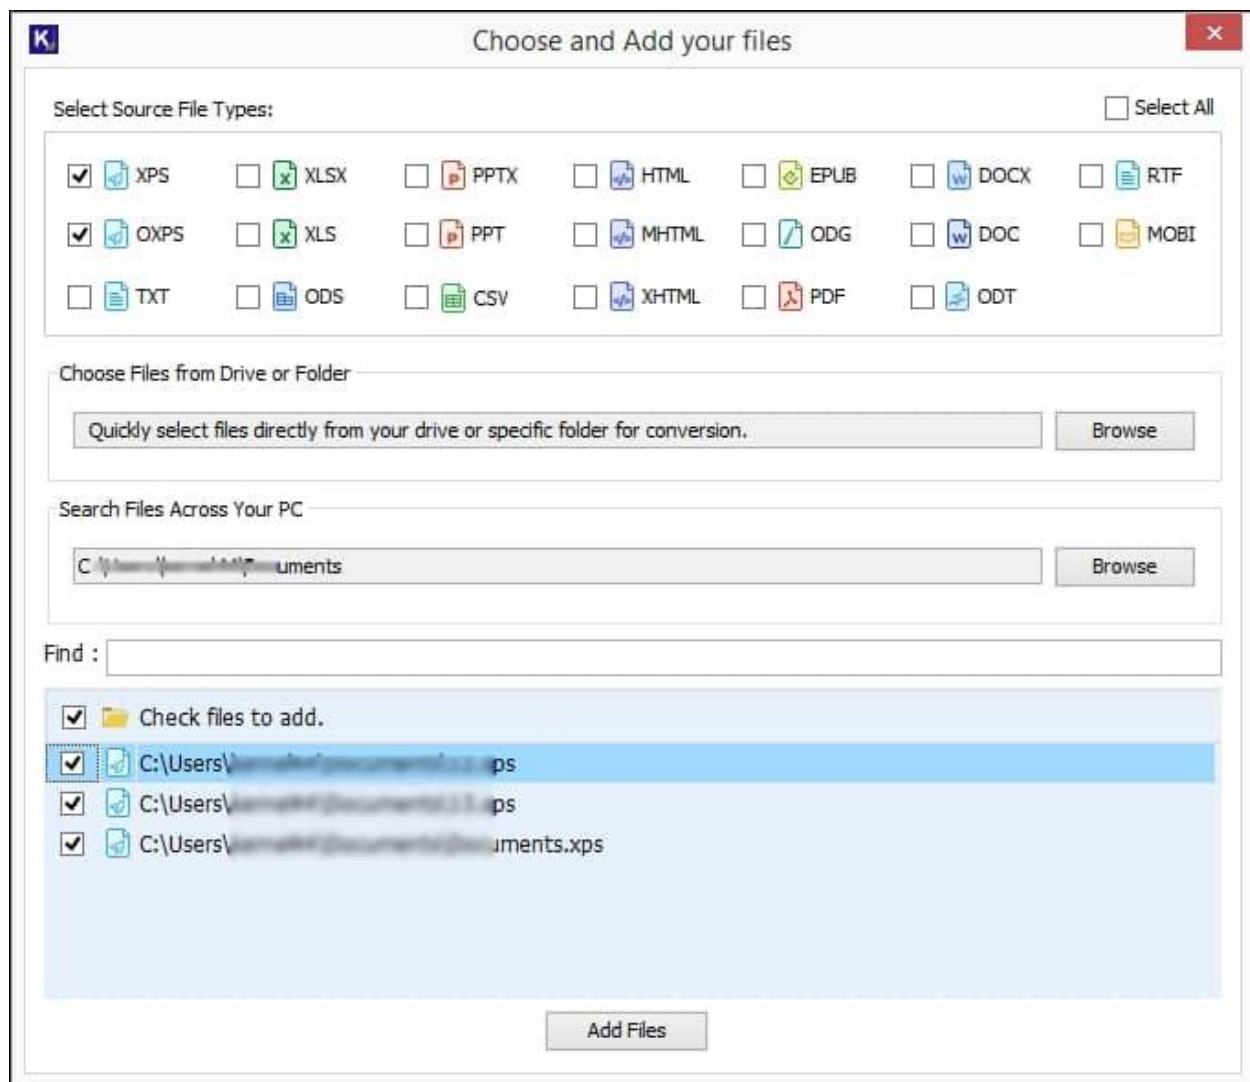

Step 1: Launch the Kernel XPS Converter, the **XPS and OXPS** file are pre-selected.

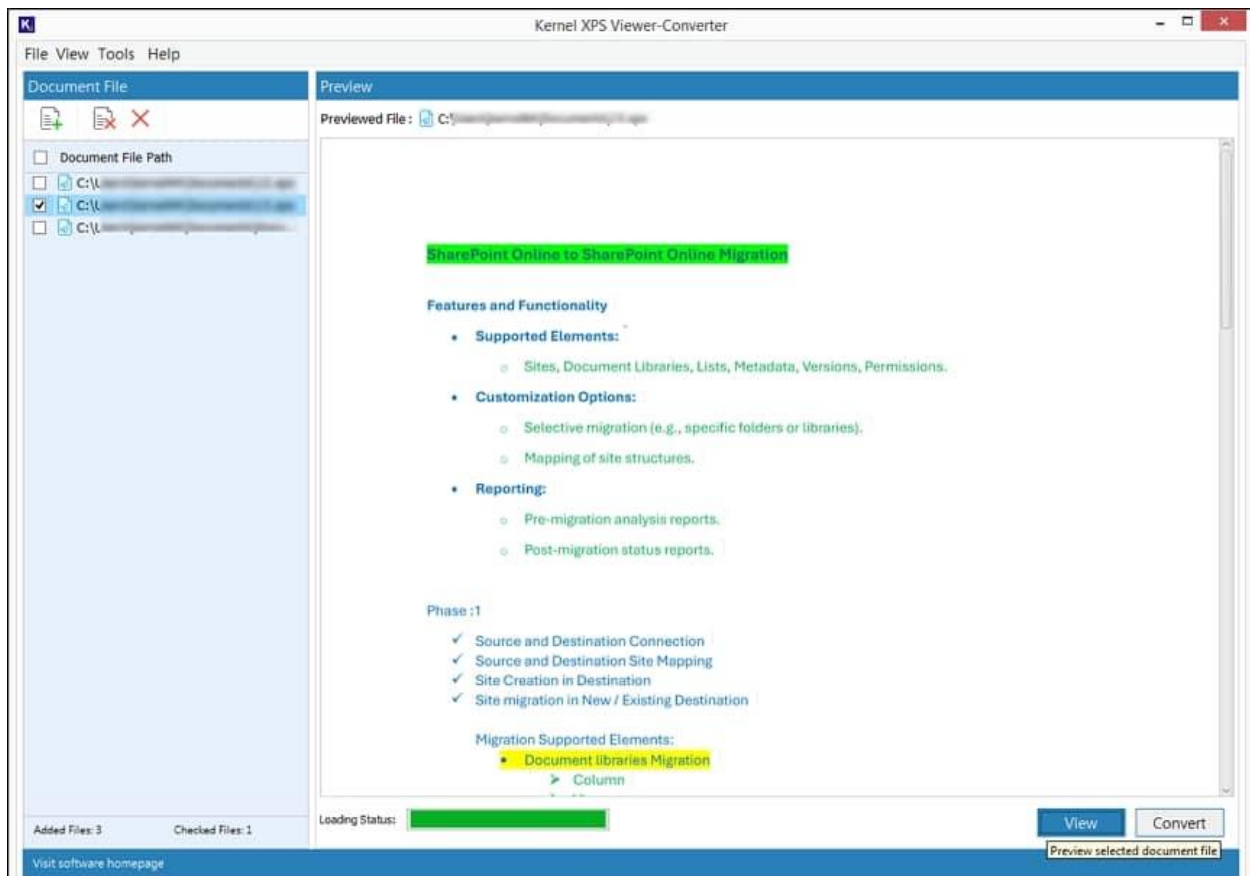

Step 2: Browse and add XPS files from any folder in the system or select complete folder to add XPS files in bulk.
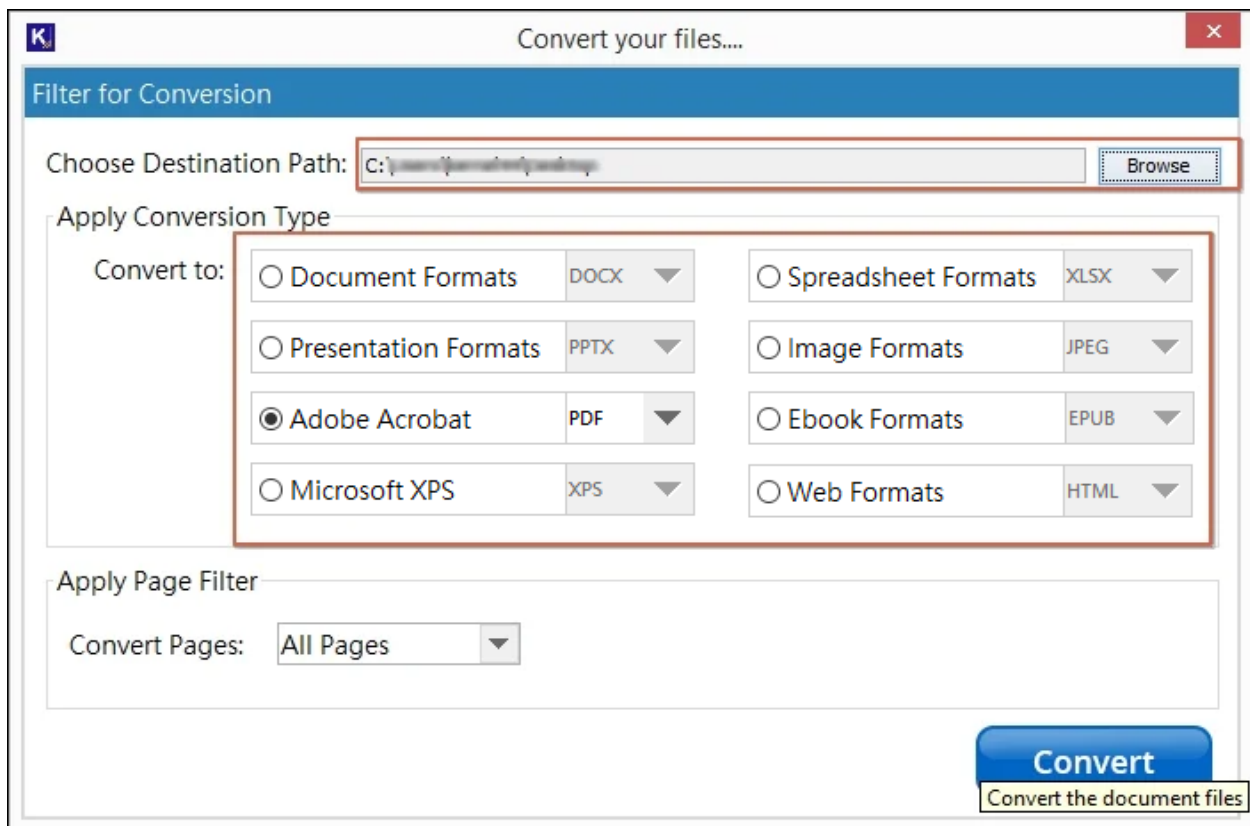

Step 3: Once all the files are displayed in the tool, select single or multiple XPS files to add into the tool.

Step 4: Choose any specific XPS file and click on **View** to preview your files before conversion. Then, click on **Convert**.

Step 5: Provide a location to save your converted files. Choose **Adobe Acrobat** as the output format and apply the page filter. Finally, click **Convert** to begin.

Step 6: Now, your files are converted. Click on **Open** to navigate to the saved file.
