# Zeigo™ Activate

Self-guided, simple, intuitive sustainability software

Track, analyze, and reduce carbon emissions with Zeigo Activate

Zeigo™ Activate by Schneider Electric is built exclusively for small and medium-sized enterprises (SMEs) to track and reduce carbon emissions at an affordable cost.

Whether businesses prefer to act independently or are part of a supply chain program sponsored by one of their customers, Zeigo Activate empowers the mid-market to set decarbonization goals, instantly see a customized plan, and find solutions to make progress.

Add your energy data to determine emissions baseline → Calculate carbon emissions and measure reduction results → Follow a customized plan to achieve decarbonization goals → Access an open marketplace of solution providers

Key Benefits of Zeigo Activate

- **Customized action plan:** Get a roadmap specific to your business' goals.

- **Create a complete carbon footprint:** Calculate, measure, and analyze.

- **Connect with Solution Providers:** Explore our marketplace of solution providers - a unique feature of our software.

- **Transparency:** Share your progress with easy-to-read dashboards.

Zeigo Activate Features

Sustainability is at the core of our business, supporting companies of all sizes. Zeigo Activate is part of a digital solutions ecosystem under the endorsed brand of Zeigo by Schneider Electric.

✓ **REPORTING CENTER** Generate and download custom reports of your energy usage and emissions data.

✓ **EXCEL UPLOAD TOOL** Use an energy excel template to upload energy data.

✓ **IMPORT TOOL** Upload utility bills for automated scanning and logging of energy data.

✓ **COPILOT** Zeigo Activate Copilot is a conversational AI tool to help with questions and contextualize information.
