9Ways Supplier Hub

Turn supplier management into a true competitive advantage

9Ways Supplier Hub extends the Purchase Management solution for Power Apps by centralizing and digitizing the entire supplier lifecycle.

Say goodbye to scattered emails, disconnected files, and manual tasks. Through a dedicated portal, suppliers can be easily onboarded, qualified, and involved in procurement processes. Data is collected in a structured way, access is managed independently, and interaction on Requests for Quotation (RFQs) and orders is direct and transparent.

All documents and communications are tracked and always accessible, ensuring greater efficiency, stronger control, and higher-quality data.

9Ways Supplier Hub

Why this app

Many companies still manage supplier relationships through emails, scattered files, and poorly structured processes, resulting in wasted time, incomplete information, and limited traceability.

This solution introduces a centralized digital model to manage onboarding, RFQs, and communications, bringing structure to every interaction.

The result is a more efficient, faster, more transparent, and easier-to-govern process, supported by reliable data that is always accessible.

9Ways Supplier Hub

Key capabilities

Guided supplier onboarding and qualification

Supplier registration takes place through a dedicated portal, with a guided and fully digital process.

Based on parameters such as supplier type, geographic area, and product category, the system automatically presents dynamic questionnaires to collect the required information.

This enables the procurement team to:

- Independently define qualification processes
- Collect complete and structured data
- Eliminate fragmented email exchanges

9Ways Supplier Hub

Key capabilities

Self-service access management

Suppliers can directly manage:

- Their own users
- Portal access levels and permissions

This reduces the internal operational workload while ensuring control and security.

9Ways Supplier Hub

Key capabilities

RFQ management

Suppliers can access purchase requests directly and:

- Enter prices, quantities, and commercial terms
- Add structured comments
- Communicate with the back office through an integrated chat

The result is a faster, fully tracked, and centralized process, with no loss of information.

9Ways Supplier Hub

Key capabilities

Integrated document management

Attachments are managed through SharePoint, with native Dataverse integration.

For suppliers:

- Dedicated repositories for each area
- A simple and transparent user experience

For the company:

- Documents that are always organized and accessible
- Centralized governance and security

9Ways Supplier Hub

Key capabilities

Purchase Order management

Suppliers can:

- View Purchase Orders
- Upload related documentation, such as advance delivery notes and operational documents
- Communicate directly with the back office through an integrated chat

9Ways Supplier Hub

A solution designed to digitize supplier onboarding, RFQs, and day-to-day supplier operations

What you gain

- Elimination of email as an operational channel
- Higher quality and greater completeness of collected information
- Reduced onboarding and supplier management time
- Greater autonomy for the procurement team in defining processes
- Structured, centralized, and fully traceable supplier collaboration

All in one space: structured, centralized, and fully traceable

Thank you
