» Human in Loop console

Automation
» Robotic process automation
» Chatbot no-code user journey development
» Service orchestration & automation

AutomationEdge Hyperautomation Platform is an integrated approach to enable digital transformation across business functions. It combines element of automation, Artificial Intelligence, ETL, Machine Learning, integration and smart analytics to enable end-to-end workflows that goes beyond RPA. AutomationEdge help organizations automate not only mundane, repetitive, rule-based tasks but also complex, cross-functional tasks across enterprise whether in the front office, middle office or back office. It also offers a library of reusable pre-built robots/adaptors, named AutomationEdge Bot Store, to quicken the development cycle. The store includes pre-built automation for IT, HR, Finance, Accounting, Marketing, spreadsheet processing, ERP, CRM, AML, etc.

Enterprise Wide Automation
