

Power Apps Training Day

Learn how to build business apps with Power Apps in just one day.

What You'll Learn:

- **Instruction:** We'll teach you how to use Microsoft Power Apps and Microsoft Power Automate to create an app for business purposes.
- **Hands-on Training:** You'll build your own app by solving a series of practical tasks, with our instructors available to guide and assist you throughout the day.

Who Should Attend:

This course is specifically designed for employees in private companies and may not address the needs of public sector employees.

No Developer Skills Required:

Power Apps is a "low-code" platform and part of Microsoft Power Platform, so you don't need developer skills to attend. Basic IT knowledge will make it easier to follow along, but both beginners and experienced users are welcome.

What You Need:

Just your own laptop. We'll provide everything else you need to build an app from scratch during the course.
