Cloud Migration: 4 Week Implementation

Providing you with expert Cloud migration strategies tailored to your business needs, with an emphasis on reducing costs and increasing performance.

Microsoft’s Azure Cloud provides a convenient way to modernize and optimize your business applications and systems, allowing improved performance and reasonable pricing.

Abersoft's Cloud Migration Implementation will evaluate your current situation and create and implement a strategy that best fits your business into the Cloud.

Abersoft will help you through the cloud migration process through:

- A deep-dive into your current systems and setting our goals and expectations for the migration.
- Evaluating performance, security, and cost requirements for the Cloud.
- Determining migration methods for each item and identifying areas that need to be refactored before the migration to the Cloud.
- Create a training plan for your business to get your employees up to speed on operating with the Cloud.
- Develop a transition plan to minimize interruptions to your business operations.

Prices and timelines may vary depending on the size and scope of the project.
