## Who are we?

Ab Initio is a software company and global leader in data processing, data management, and data governance, *at scale*.

For 30 years, we have helped the largest firms in the world in finance, telecom, gaming, logistics, or healthcare, solve their *hardest data challenges*.

## What do we do?

Ab Initio is a technology platform for building and running data-centric applications, including:

**Enterprise Data Platforms**

- Data lake/mesh/fabric construction
- Automated data pipelining at scale
- Enterprise-class data catalog/data products
- Business self-service data quality/controls
- Data lineage end-to-end, data tracing
- Metadata management for the enterprise
- Policy-driven data governance

**IT Modernization**

- Accelerate and derisk cloud migrations
- Legacy takeout, incl. mainframes/Cobol
- Low-code application development platform

**Enabling A.I.**

- Connect your firm data to your AI ambitions
- Industrialize feature engineering/data science
- We do not do AI. We enable it.

## Our culture

We are a company of engineers. With roots in supercomputing, engineering *from first principle* is in our DNA. It is even in our name: Ab Initio!

All our R&D is done in-house, at our main office near Boston, MA. No outsourcing. No offshoring.

We do not do traditional marketing. Instead, we put our investment dollars into product development and customer POCs.

Our customers' success *is* our marketing*

## Why Ab Initio?

Our technology platform drives faster speed to market, lower TCO and better collaboration with the business.

We focus on solving real problems, not on trying to be the cool tech of the day.

Global presence with customers in more than 35 countries, including 70% of G-SIB banks.
