

Microsoft Sentinel XDR + SIEM Installation Services

a Microsoft preferred solution

Highlights

Quickly strengthen your security posture and protect against threats.

Defined deployment roadmap based on your environment and goals.

Custom-tailored security strategy.

Focus your attention on running and growing your business.

Security Copilot: Prompt Engineering, workflow integration and optional co-management

Unlock the power of Microsoft's SIEM to strengthen your security posture and protect your business from ongoing threats.

Start using Microsoft XDR and/or SIEM technologies immediately, automatically scale to meet your organizational needs, and only pay for the resources you need.

AccountabilIT can help you deploy your first instance of Sentinel with all your requirements in mind. Together, we can build a proper cloud-native SIEM experience, all within your Microsoft Azure environment

Integrate with existing tools, whether business applications, other security products, or home-grown tools, and use your own machine-learning models. Optimize for your needs by bringing your own insights, tailored detections, machine learning models, and threat intelligence. Invest in security, not infrastructure setup and maintenance with the first cloud-native SIEM from a major cloud provider.

Never again let a storage limit or a query limit prevent you from protecting your enterprise.

Additional custom solutions for your unique organization

Every organization is different. We tailor our solutions to fit your environment and goals.

Remote monitoring

If your organization doesn't have its own security operations center (SOC) or if you want to offload some monitoring tasks, AccountabilIT can perform remote monitoring and threat hunting for you.

Joint threat exploration

If your organization is interested in learning how to integrate Microsoft Sentinel into your existing SOC by replacing or augmenting an existing SIEM, we will work with your SecOps team and provide additional readiness to bring them up to speed.

You own it.

Our pioneering use of Azure Lighthouse allows you to own and control your environment.

Offer Includes:

- Deployment of Microsoft Sentinel, Log Analytics, Logic Apps and Automation
- Configuration and testing of all applicable Microsoft Sentinel data connectors
- Entity configuration mapping for optimal Sentinel investigations
- Microsoft Sentinel data collection review and tuning, including rule templates
- Formal engineering review of dashboards and incident triggers
- Optional Security Copilot: Prompt Engineering, workflow integration and optional co-management

We implement all stages, end-to-end, without outsourcing or subcontracting.

What we'll do:

Analyze your requirements and priorities for a SIEM deployment

Define scope & deploy Azure Sentinel in your production environment

Build a customized play book for your organization

Why AccountabilIT?

As one of just a few partners with Microsoft's **Threat Protection** and **Cloud Security Advanced Specializations**, we take security seriously. We are honored to be recognized as a Microsoft Security Solutions Partner.

You need an experienced partner with a record of excellence. AIT, a Soc 2 Type 2 organization, is proud to have been recognized for the past 7 consecutive years as one of the top 250 MSSPs worldwide by MSSP Alert.

**SOC 2
TYPE II
CERTIFIED**
