

AI Hub | Solution Platform

Advania AI Hub provides a centralized platform solution for Your unique Microsoft Azure OpenAI needs

A singular application cannot solve all Your critical issues, whereas multiple solutions are challenging to maintain and difficult to adopt. A platform provides the utility of multiple solutions with the ease of one.

One-stop shop - Advania AI Hub is a versatile and rapidly deployable platform solution based on Microsoft Azure OpenAI. Centralize general and specific solutions under a single platform and ensure a secure and user-friendly experience for end-users.

- ✓ As organizational needs evolve, the platform accommodates new Agents - with select capabilities, models and connectors
- ✓ Desktop or mobile, the end-user will always have the same, familiar user experience no matter what they might need.
- ✓ Installed into Your own environment. A secure way to utilize AI with Your organizational data without third-party interference.

Why choose the Advania AI Hub solution?

- ❖ No license fees; one-time development cost and Microsoft Azure pay-as-you-go model
- ❖ No vendor lock; deployment is performed in Your own Microsoft Azure environment.
- ❖ No limitations; AI and data sources limited only by API availability

Deployment starting price EUR 9,900 (+VAT) includes the AI Hub platform, conversational GenAI Leader Agent with Your organizational tone of voice, document analysis capability (RAG), selected organizational branding (color scheme, logo), and web interface with Entra ID authentication.

Options available. The solution can be tailored extensively to Your organizational needs.
