

Microsoft Fabric | Adoption Package

Centralized Platform for all of Your Organizational Data

Why Microsoft Fabric?

- **All in one place** – A unified analytics platform that combines data warehouses, integration, and analytics.
- **Easy deployment** – No complicated system integrations, just a ready-to-use package.
- **Powerful AI** – Built-in Microsoft Azure OpenAI enables intelligent analytics and automation.
- **OneLake** – One Truth About Data – One central repository for all data types, eliminating data siloes.
- **Cost-effectiveness** – One platform reduces management costs and optimizes resource utilization.
- **Security and manageability** – built-in enterprise-grade security, access management, and compliance
