

# SOLUTION OVERVIEW

Traditionally, employees perform various business-related tasks in multiple systems and these systems need to be configured with different accounts and access permissions.

This can become cumbersome and create confusion.

4share solves this problem by being the central place for companywide visibility and enables you to action your tasks quickly and easily. This essentially means that every work-related thing you are responsible for can be done on a single platform to optimise productivity and make life easier.

## Your all in one work environment

# THE THREE BUILDING BLOCKS

### 1. The Portal

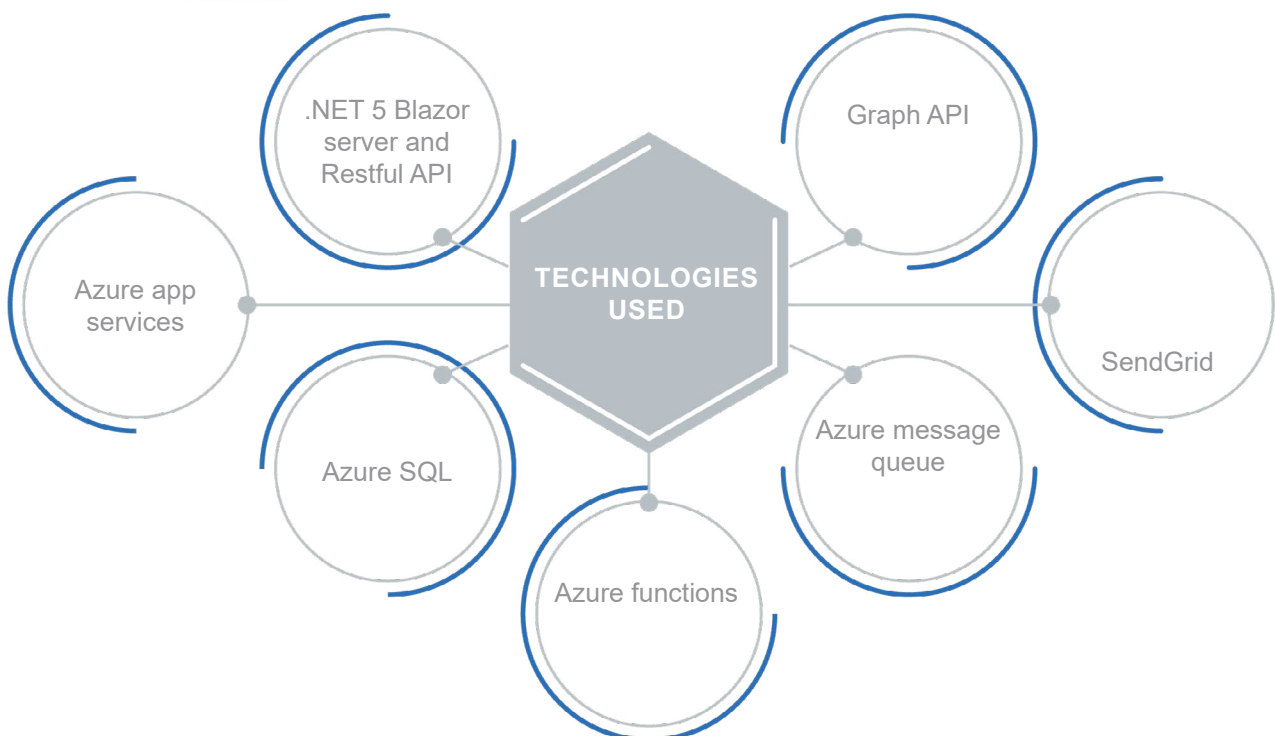

The entry point where users can sign-in, search for, view information and perform their daily tasks.

### 2. 4flow

The powerful workflow engine that facilitates data entry and provides process driven approvals on actions originating from the portal or other external sources, integration to external sources updating the data vault.

### 3. Data Vault

The enterprise grade data warehouse solution where information is compiled into an Infomart that provides a single view of business concepts like Product, Customer and Employee. It therefore becomes the source for the portal's search results, dashboards and reports.

# FEATURES
