MICROSOFT 365 BACKUP

2024

OVERVIEW

4security: Microsoft 365 Backup as a Service

Microsoft 365 backup as a Service offers the management and infrastructure for the backup and recovery of OneDrive, SharePoint, and Exchange Online data for large volumes of data within the Microsoft 365 security boundary.

KEY FEATURES

Comprehensive Data Protection

Microsoft 365 backup covers critical data sources such as OneDrive, SharePoint, and Exchange Online, ensuring that all essential data is safeguarded.

High-Speed Recovery

The solution offers rapid recovery capabilities, allowing businesses to restore large volumes of data quickly and efficiently, minimising downtime.

Redundant backups

Multiple redundant backups are maintained within the Microsoft 365 security boundary, enhancing data reliability and security.

BENEFITS

Business Continuity

Ensures that businesses can quickly recover from data loss incidents, maintaining operational continuity.

Security and Compliance

Adheres to stringent security standards and compliance requirements, providing peace of mind for data protection.

Scalability

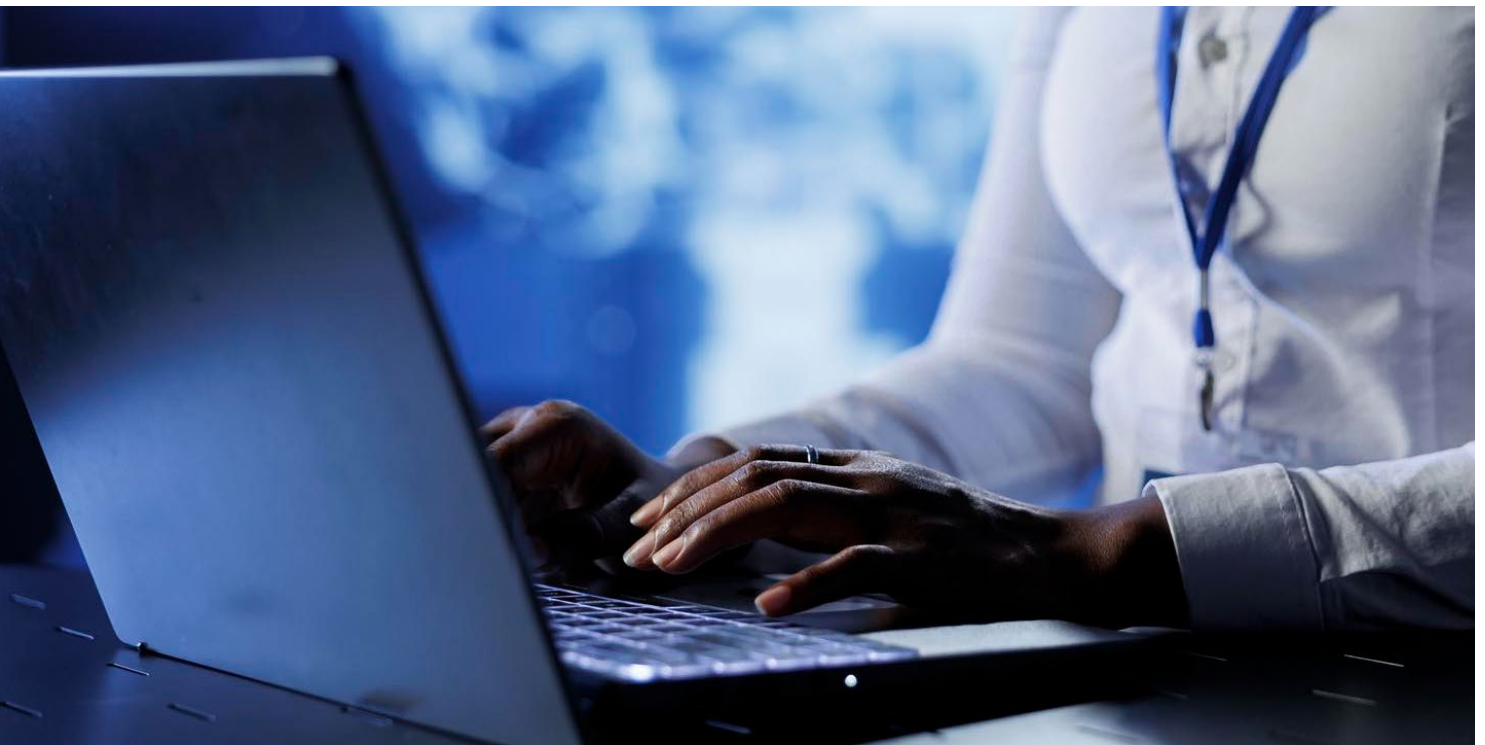

Suitable for organisations of all sizes, from small businesses to large enterprises, thanks to its scalable architecture.

WHY CHOOSE US?

We are a trusted partner for Microsoft 365 backup and recovery solutions. We have extensive experience and expertise in delivering reliable, scalable, and secure data protection services.

We offer:

- A fully managed service that takes care of all the backup and recovery tasks, from policy creation to restoration testing.
- A flexible and cost-effective pricing model that aligns with your data usage and business needs.
- A dedicated team of certified experts who provide ongoing support and guidance.
- A proven track record of successful implementations and customer satisfaction.

OUR PROCESS

We follow a simple and transparent process to deliver our Microsoft 365 backup and recovery services,

- Conduct a thorough assessment of your current data protection needs and challenges.
- Design a customized backup and recovery strategy that meets your requirements and preferences
- Implement the Microsoft 365 backup and recovery solution using best practices and industry standards.
- Monitor and manage the backup and recovery operations and performance.
- Provide regular reports and insights on your data protection status and outcomes.
- Review and optimize the backup and recovery solution as needed.
