# DEVELOPMENT AS A SERVICE

# WHY YOU SHOULD USE DEV AS A SERVICE

Development as a Service (DaaS) is a service provided by 4Sight's Application Modernisation team. DaaS is a service that provides managed software developers allocated to a specific customer on a permanent full-time basis at a fixed discounted fee per month. Software developers with a specific skill set and experience level are selected based on the customer's individual requirements.

## Key benefits

- Managed Development Services:
- Bespoke Software Development
- Development Methodology (Agile – 2-week sprints)
- Manage Deliverables
- Architectural Advisory Services
- Tailor Made Development Team
- Discounted to Normal Projects

## BUSINESS OUTCOMES

The software developers will be allocated permanently on a full-time basis to the customer for the duration of the engagement. Their responsibility will be to document, develop and provide technical support on any existing bespoke developed software or future features/enhancements required by the customer. Technical advice will be given where needed.

An agile development methodology will be implemented where development requirements are planned and specified in sprint planning sessions. Sprints are developed cycles which usually run over two weeks. Both parties will agree and approve all the development tasks that will be worked on in the so-called sprints. Estimated time or story points will be assigned to each task in each sprint planning session.

A retrospective session will be held at the end of each sprint to review all the requirements that were delivered in the sprint. The customer needs to sign off all the deliverables that were completed in the sprint.

4Sight will advise and implement best practice techniques for software development.

# CONTACT US

Incorporated in 2017, 4Sight is a JSE AltX (ticker: 4SI) listed, multi-national, diversified technology group. Our purpose is to leverage our extensive product and services portfolio, focused on 4IR technologies, people and data-focused solutions to design, develop, deploy and grow solutions for our partners (customers and vendors).

The company's mission is to empower our partners to future proof their businesses through digital transformation to make better and more informed decisions in the modern digital economy.

4Sight's business model enables its partners to take advantage of products and solutions within its group of companies, which will allow them to enjoy turnkey digital transformation solutions across industry verticals.
