DataHub By Acryl Data

DataHub Cloud

Unlock Discovery, Governance, and Observability for Data and AI

Acryl Data's DataHub Cloud is a modern, fully managed platform for data discovery, governance, and observability designed to empower enterprises in managing growing data ecosystems. From the company behind the popular open-source DataHub project, DataHub Cloud provides advanced capabilities to tackle the complexities of data visibility, quality, and control at scale.
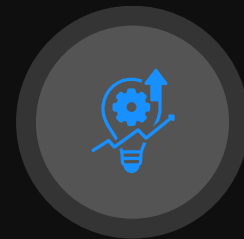

Why DataHub Cloud

Speed to Insight

Accelerate data discovery with an intuitive platform designed for users of all technical skill levels.

Collaboration at Scale

Break down data silos and promote a culture of data-driven collaboration across your organization.

Future-proof Data Management

Stay ahead of the curve with a solution designed to grow with your business and adapt to new data challenges.

Trusted By Leading Enterprises Worldwide

"Before bringing Acryl Data's DataHub Cloud on board, MYOB's data teams would see multiple breaking changes per week. Since integrating Acryl into our workflow about a year ago, even though our overall usage of Snowflake has gone up 4 times, Acryl has helped us significantly reduce the number of breaking changes, to the extent that they are no longer a burden on all teams."

Asad Naveed, Engineering Manager, MYOB

DataHub Adopters

Key Features

Centralized Data Discovery

- Unified Metadata Search
- Powerful Metadata Graph
- Automated Lineage

Advanced Data Governance

- Fine-Grained Access Controls
- Compliance Monitoring
- Data Ownership & Stewardship

Scalable Metadata Management

- Crowdsourced Metadata Ingestion
- Schema Versioning
- Data Contracts

Observability & Monitoring

- Data Health Dashboards
- Change Management & Auditing
- Automated Alerts

Cloud-Native & Fully Managed

- Zero Infrastructure Management
- Multi-Cloud Support
- Enterprise-Grade Security
- "BYOC" - Bring Your Own Cloud

"We rely on Acryl Data to gain insights and ensure our critical data is reliable. Acryl's managed product, Datahub Cloud, takes DataHub to the next level through automation and emphasis on time-to-value."

Ada Draginda, Senior Staff Engineer, Notion

ABOUT US

The Company Behind The #1 Open Source Metadata Platform
Acryl Data's mission is to enable organizations to effectively find, organize, and use trustworthy data. Acryl Data is the company behind the open source DataHub project, an extensible data catalog that enables data discovery, data observability and federated governance to help tame the complexity of your data ecosystem.
