Uncover Shadow AI with Viatel's Data Security Workshop

Uncover the hidden risks that threaten your organisation's most valuable assets. Shadow AI and unseen vulnerabilities are already at play, posing serious challenges to data security, privacy, and compliance. As **Microsoft Ireland's Modern Work Partner of the Year**, Viatel brings unmatched expertise to help you stay ahead. Our **Data Security Workshop** shines a light on what's beneath the surface, giving you the insights and strategies you need to protect sensitive information, mitigate compliance risks, and stay firmly in control.

80%+
of leaders cited leakage of sensitive data as their main concern around adopting Generative AI

Your Roadmap to Data Security and Compliance

- Document your objectives and strategy around data security, privacy and compliance.
- Show how to detect, investigate and take action on Data security and privacy risks.
- Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies
- Provide actionable next steps based on your needs and objectives

What to expect

- Understand the risks of *Dark Organisational Data*
- Learn about the risks organisational insiders may impose
- Assess your environment against key data protection standards
- Receive an analysis and report on findings and associated risks
- Learn about tools and services that can help mitigate risks
- Explore recommendations and next steps

4 Recommendations and Next Steps

Data Security Check: The Foundation for AI-Ready Compliance

At Viatel, we're passionate about helping organisations embrace the power of AI to drive innovation – without ever putting their data or reputation at risk. The **Data Security Check** is a cornerstone of our **Data Security Workshop**, designed to ensure that AI enhances your business rather than undermines it.

AI is reshaping how we work and interact, and protecting your organisation's data has never been more critical. That's why our automated process, powered by Microsoft Purview, gives you the clarity and confidence to move forward by:

Discovering and analysing data across your Microsoft 365 Cloud to identify artefacts that could pose security risks.

Monitoring user behaviour to uncover vulnerabilities – from intellectual property loss to workplace harassment – and now, risks linked to generative AI applications.

Data Security Check: Built for Modern Workplaces

Designed around Microsoft 365
Structured to align with the services and data repositories your organisation uses every day.

Core capabilities
- Analyses user behaviour for potential risks
- Scans key data repositories including:
  - Email
  - Collaboration tools
  - Document storage

Optional extensions
Add modules to broaden your security scope:
- On-premises data repositories
- Windows 10/11 endpoints
- Generative AI interactions
- And more

Unified framework
Every activity follows a consistent approach, helping you:
- Understand the risks within your organisation
- Develop a clear roadmap to mitigate threats
- Protect your company's most valuable asset – its information

Workshop Outcomes

By the end of this workshop, Viatel's AI experts will provide you with a:

✔ **Security Check Report**
Key findings and insights from the automated discovery process.

✔ **Actionable Recommendations**
Practical steps to mitigate identified risks.

✔ **Microsoft's Approach**
Clear view of data security and insider risk controls.

✔ **Compliance Assessment (Optional)**
Tenant report with improvement actions.

✔ **Long-Term Strategy**
Compliance roadmap with key initiatives and next steps.

With Viatel, AI becomes an asset, not a liability. We help you innovate securely, ensuring your people, your data, and your future are protected.
