

# Security Modernization Assessment

## What is Security Modernization?

Securing your cloud environments requires the same practices and principles as your on-premise environment. The difference is **the tools you use to accomplish securing your cloud environment.**

ACTS' Security Modernization helps you understand the **cloud security tools, controls and principles** that you need. Delivering an **Azure security roadmap and remediation plan** to start you on your path.

ACTS will partner with you to **map out your modern security architecture to facilitate effective decision making on your cloud journey and discuss potential co-funding opportunities.** Under certain circumstances some or all of this engagement may be subsidized, email [ModernSecurity@actsolution.net](mailto:ModernSecurity@actsolution.net) to see if you qualify.

4.1B

records exposed by data breaches in the first 6 months of 2019

20%

of organizations lose customers during an attack

30%

of organizations lose revenue during an attack

28%

of attacks come from the inside - harder to detect

## Secure Your Cloud

Moving to the cloud can introduce new risks, consequently you need a high degree of confidence in the security of your cloud environment. **Consider a Security Modernization Assessment.**

- Transform your current and future state Cloud Security
- Control conditional access for mobile devices and users
- Access Control, Monitoring, and Threat Defense for secure cloud usage
- Define required roles and corresponding responsibilities to establish and maintain security

# ACTS' Approach to the Security Modernization Assessment

**Identify** your executive sponsor and stakeholder team responsible for cloud cybersecurity transformation.

**Evaluate and Assess** your current security for cloud management (identity, IaaS, PaaS, modern workplace and applications), cloud resource configurations, preventative and detective controls and cloud security tools.

**Analyze** your current security objectives, provide future state gap analysis and risk controls mapped for each service and workload.

**Align** your customized recommendations against industry requirements and standards.

## Benefits of ACTS' Security Modernization Assessment

- Fully documented plan for cloud security and adoption
- Increased risk and compliance visibility with modernized security strategy
- Knowledge transfer and security readiness documentation
- Design and strategy for cloud security controls, monitoring and threat defense

“ In Coming Years the Average Cost of a Data Breach Will Exceed \$150 Billion ”

-Juniper Research

## Next Steps

Are you ready to modernize security in your organization?
