

Microsoft 365 (M365) Security and Compliance Assessment

2019 MSUS Partner Award – Intelligent Cloud Azure Influencer

2018 Microsoft Open Source Data & AI Partner of the Year Award Finalist

A Strong Security Posture is Critical

ACTS Microsoft 365 Security and Compliance Assessment **secures your business operation by providing key insights** to help you establish the right processes for **cyber-risk reduction**. We support you in your journey to a **secure modern workplace** through discovery, assessment and in-depth guided workshops, culminating in recommendations that **support your security and compliance posture**.

ACTS will partner with you to cultivate a secure modern workplace and discuss potential co-funding opportunities. Under certain circumstances some or all of this engagement may be subsidized, email M365Security@actsolution.net to see if you qualify.

Are These Risks That Concern You?

- **Rising cost** of operating and maintaining legacy systems
- Maintaining compliance with **data privacy** legislation like HIPPA, GDPR, SOX and more
- Increasingly **sophisticated attacks** against your organization's identities
- Unknown amounts of sensitive business data that **expose you to data leaks/breaches**

Microsoft 365 offers a comprehensive set of features to address security and compliance.

81%
of all hacking related breaches use **compromised credentials**

Enterprise-Level Identity Protection

Limits access to organizational systems to only the right people

73%
of individuals use **only 3 or 4** passwords across all of their accounts

Control and Protect Information

Helps ensure docs and emails are viewed only by intended recipients

95%
of phishing attacks that were followed by some form of software installation

Proactive Attack Detection and Prevention

Thwarts hackers and recover quickly if attacked

Taking an Active Approach to Securing Your Organization

ACTS offers interactive workshops exploring current security plans and policies. We'll examine operations and services that may show threats and risks. ACTS will discover and make recommendations on securing your modern workspace.

ACTS Delivery Process

Discover

ACTS team consults with your team and helps discover and clarify your organization's pressing security and business challenges

Assess

With the use of a temporary M365 E5 license, we provide a threat check assessment and compliance discovery of your IT environment
