ACTS Azure Cloud Foundation

A More Secure Transformation

ACTS understands that moving to a cloud environment can be complex and time consuming. Our Azure Cloud Foundation (ACF) creates a well-defined plan for departments, accounts and subscriptions through planning, documentation, strategy and process.

Do any of these come to mind as you consider your cloud journey?

- ✖ Lack of operations and governance
- ▦ Managing complex environments
- ⬗ Cost management and budget concerns
- ↻ Software and hardware refresh

- 💡 Limited innovation
- ⟳ Business agility and flexibility
- Slow and inconsistent response to change

Benefits of an Azure Cloud Foundation:

Our team has **been in your shoes**, across multiple industries implementing cloud strategies. Within Azure Cloud Foundation, ACTS conducts workshops to **define IT requirements, policies and governance** for cloud implementation design. ACTS will partner with you to start your **Modern Cloud Transformation Journey** while adhering to industry best practices.

An ACF will provide:

- Fully documented plan for cloud adoption
- In depth training
- Architecture decision verification
- Scalable design aligned to your cloud goals
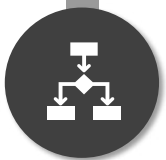

Starting Your Journey

Workshops
ACTS conducts workshops with your team to facilitate decision making, create policies and define procedures around working and creating a sustainable foundation in the cloud.

Functional Specification
ACTS provides an in-depth Functional Specification Document to preserve the decisions and policies made by your team.
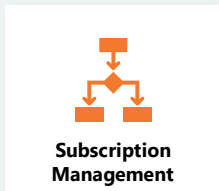

Your Decisions
Upon completion of each series of workshops, we'll define decisions that guide your Azure implementation strategy.

## ACTS Will Evaluate Policies In The Following Areas:

|					
Enrollment & Account Management	**Subscription Management**	**Azure Organization & Operations**	**Naming Conventions**	**Storage**	**Compute**
Governance	**Identity**	**Networking**	**Security**	**Business Continuity & Disaster Recovery**	**Automation**
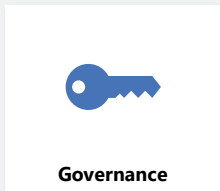

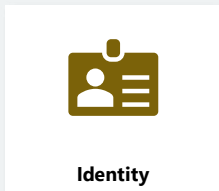

Next Steps
