AZURE COST OPTIMIZATION

OBSERVE, RECOMMEND, AUTOMATE AND TRANSFORM

Azure Cost Optimization

30+% SAVINGS ON YOUR NEXT AZURE BILL.

70%
of cloud spend is wasted each year due to poor architecture and overprovisioned resources

Source: Gartner

36%
Amount of company time wasted on reactive troubleshooting

Source: Fugue.co

80%
of organizations will overshoot their IaaS budgets, due to lack of cost optimization approaches, through 2020

Source: Gartner

ACO delivers the most actionable optimization recommendations with the power of AI at your fingertips. This cloud cost intelligence tool helps you in predictive rightsizing of Azure workloads to eliminate unnecessary spend and ensure optimal performance. Catalogues top cost drivers using advanced machine learning algorithms and forecast the cost bleed accurately. It also facilitates the auto-provisioning of resources reducing manual efforts for engineering teams.

KEY FEATURES

- Proactive Cost Optimization
- AI-Enabled Cost Anomaly Detection
- Data Insights On Forecast and Budget
- Services Analysis & Provisioning
- Robot to Perform Actions on Recommendations
- Governance, Admin Control, Security & Compliance
