

**three
rocks
Smart
Slides**

A customised slide library to create bespoke slide decks

Store all your organisation's slides in one place, so when creating a new deck for a project or prospective client all the content is up to date and ready to be pulled together.

Filter through your slides to only show relevant content for your needs, making slide deck creation seamless.

For example, if you are pitching to a school, search your slide 'library' for education, then all your slides on education will be shown and you add the relevant ones to your deck.

PowerPoints are made more efficiently. Utilising content you've already created and helping you to show examples of previous work/projects you've already completed

three rocks Smart Slides process

Create

Create your slides for varying purposes and projects.

Upload

Upload your slides to Smart Slides, adding tags for each slide.

Search/filter

When making a deck, search for the slides you need, this will filter them so only relevant slides are shown.

Select

Drag the required slides from the filtered list and build your presentation.

Final deck

Once you have your required slides, download the deck and it will open in powerpoint, ready for use.
