

adaptiv.assess

You're ready to make your move. Your business or organisation has agreed to undertake an integration project and has chosen the technologies needed to support a successful outcome. But the next big questions are: 'Are we ready? How mature are our approaches? And how do we move forward?'

Challenges

How do you know if you're ready for an integration platform refresh to support your digital transformation initiatives?

Do you have a clearly defined API Strategy? And how will you manage key staff departures and handing over knowledge to new people?

Solution

adaptiv.assess is a 3-5 day maturity workshop design to take Development Leads, IT Managers, Enterprise Architects, and technology users through an in-depth evaluation of your technology environment.

Outcome

By the end of this workshop, you will understand the capabilities and shortcomings of your current integrations, establish where you want to be in the future, and what you need to do to get there.

You will also have an estimate from us of the costs involved and a project timeline.

adaptiv.assess

“As part of the adaptiv.assess workshop,” says Micky Heath, Victoria University of Wellington Project Manager. “Nikolai led us through a co-design process where we got everything reviewed, documented and squared up before we started development. We ended up with a comprehensive blueprint for success.”

A partner you can trust

We're a New Zealand owned and operated consulting partner invested in helping you to leverage and extend the value of your existing business applications, not selling you new ones.

We provide world-class integration and cloud technology consulting and execution services.

Value you can count on

With over a decade of experience in delivering small- and large-scale integration for the enterprise, we add clear, repeatable and measurable value to our clients' bottom-line.

That's why we are the partner of choice for some of New Zealand's leading organisations.

Confident decision-making

Clarify the forward path with defined and fully documented project roles, responsibilities, and processes.

With a clear understanding of the value and limitations of your current approach behind you, you will be able to plan a successful technology roadmap for the future.

adaptiv.assess

Services

adaptiv.assess is the third in a series of four workshops designed to help you to undertake your project with confidence, establish desired business outcomes, define future goals and offer proof of value to stakeholders.

adaptiv.align

A 3-hour strategic alignment meeting with organisational C-level stakeholders to introduce Adaptiv Integration solutions, services and capabilities.

adaptiv.educate

A half-day technical product briefing to discuss available and recommended technologies.

adaptiv.assess

A 3 to 5-day maturity workshop to establish the value and limitations of your current approach, facilitate discussions around definition roles and responsibilities, processes and future technology roadmaps.

adaptiv.verify

A 2 to 3-day workshop is designed to prove that the selected technologies and approach will deliver the concrete outcomes required by the business.

adaptiv.deliver

adaptiv.deliver is your blueprint for success. Our Architects and Developers work with your team to guide you

About us

We're a New Zealand owned and operated consulting partner, invested in helping you to leverage and extend the value of your existing business applications, not selling you new ones. We have a wealth of development and integration experience in moving clients from around the world onto private cloud-based SaaS platforms.

We're invested in helping you to leverage and extend the value of your existing enterprise applications, not selling you new ones. When you work with us, you get results faster and for less. Because we specialise in nothing but system, data and application integration, we can usually deliver your projects.

We utilise our world-class people, expertise and tools in conjunction with proven methodologies to decrease risk and maximise outcomes. So you can always count on getting the results you expected with Adaptiv.
