

Discover the potential of AI for your organization with Copilot for Microsoft 365 to enhance your workflows, collaboration, and productivity. The **Copilot Evaluation Accelerator**, is a service that enables you to implement Copilot in a rapid and efficient manner. Find out how adaQuest can assist you in optimizing your work with AI.

- **Champions are trained to drive adoption**, and IT leads are shown how to track adoption trends using the Copilot Dashboard and Usage Reports.
- **End users receive training on applying Copilot** in their daily tasks, while optional sessions offer deeper insights into creating custom copilots.
- A series of **Lunch & Learn** sessions reinforce prompting skills in specific applications.

Copilot Evaluation Accelerator

The Copilot Evaluation Accelerator is a **comprehensive service designed to help organizations integrate Microsoft Copilot for Microsoft 365**. It involves a series of structured sessions to set up, train, and support your organization in adopting Copilot, enhancing productivity and user experience.

The engagement concludes with an IT Readout to summarize activities and address questions, followed by a final session delivering success stories and next steps for AI transformation.

Workshop framework

The program will be delivered within **6 to 10 weeks** depending on the availability of the customer. There will be activities scheduled for every week for different groups of users.

This service ensures **smooth integration, expert guidance, and continuous support**, driving user adoption and maximizing return on investment by enhancing productivity and operational efficiency.
