NextGen Windows 365 Standardized Pilot

Protect, Simplify, Power better experience.

Engagement Highlights

🔒 **Zero Trust security built-in**

Proactive remediation and automation from a single source

Protected and productive without downtime

> "Microsoft empowers you to do More With Less."

Secure your hybrid workforce with Windows 11, Windows 365 and Intune

Hybrid work creates new opportunities and new challenges...

The Workplace is still in transition, including Diverse Computing Needs, Organizational Risks and IT Complexity:

- **57% of remote employees** plan to shift to hybrid – while 51% of hybrid employees are considering a move to remote work permanently.

- **68% of companies** report experiencing a breach due to exploitation of an endpoint in 2021.

- **67% of IT Professionals** feel overwhelmed by trying to manage remote work.

The NextGen Windows Standardized pilot engagement is targeted at anyone who wants to see how Windows 365 protect, simplify, power better experience, and unlocks hybrid work scenarios.

Why you should attend

The NextGen Windows Standardized Pilot helps you land the value proposition of Windows 365 with your customers' business decision makers. **The standardized pilot is intended to be delivered as a four-weeks engagement, which includes:**

01
Focus on learning about the customer's priorities, initiatives and key influences in their hybrid work and end-user computing strategy

02
Showcase how Windows 365 unlocks enterprise hybrid work scenarios to deliver a secure and productive desktop experience from anywhere

03
Work together on piloting Windows 365 Cloud PC provisioning and management in the customer's production environment for selected users
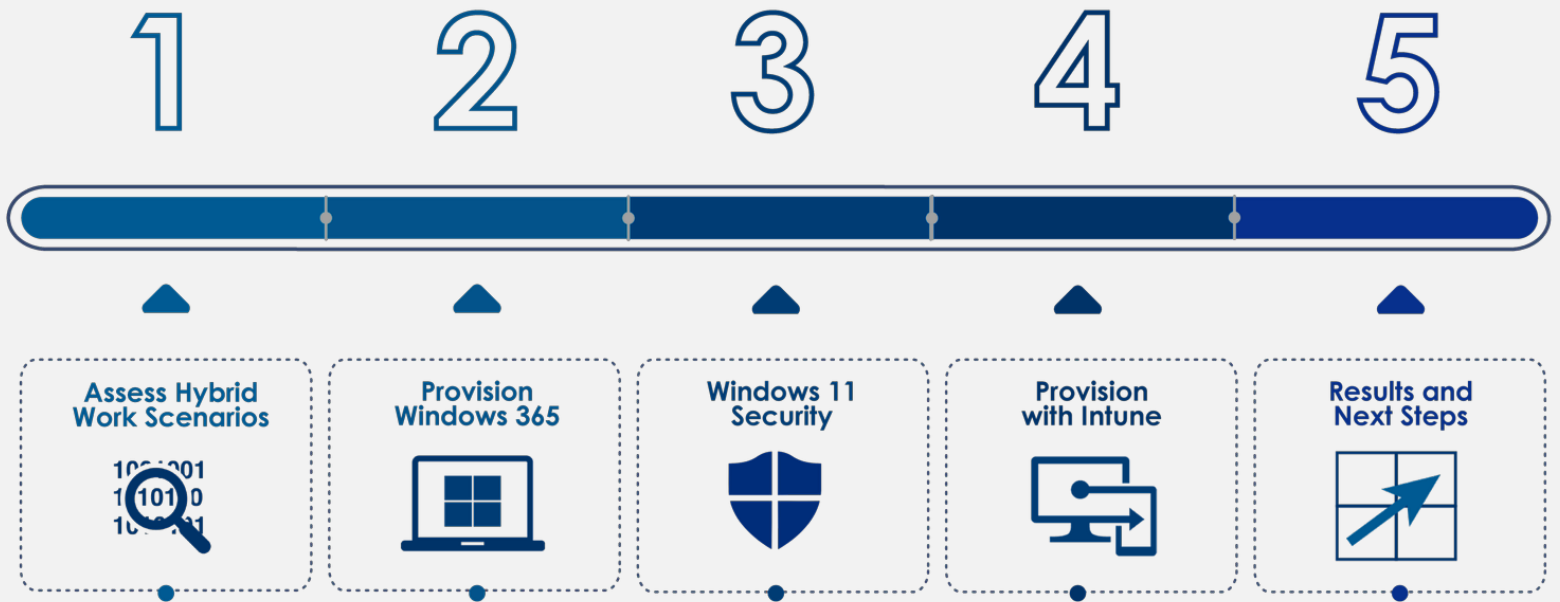

04
Plan next steps on how you can work together with your customer to further grow their Windows 365 solution

What to expect

The next generation of endpoints represents a shift in how our customers are solving end-user computing challenges. Across Information Workers, Frontline Workers, and Temporary / Elastic workforces, our customers are looking for the latest and most innovative solutions to answer those challenges.

After the Pilot Engagement, you'll:

- Improve your knowledge of cloud-based end-user computing options using Microsoft solutions
- Have a better understanding of provisioning and managing cloud endpoints with Microsoft Endpoint Manager
- Accelerate your endpoint management and end-user computing journey with Microsoft
- Have defined next steps based on your needs and objectives

1 **2** **3** **4** **5**

Assess Hybrid Work Scenarios	Provision Windows 365	Windows 11 Security	Provision with Intune	Results and Next Steps

Who should attend

CISO, CIO, CSO, IT Security & Operations, Security Architect and Engineers, Endpoint & Device Management owners.

Why adaQuest?

When it comes to Unified Endpoint Management you need an experienced partner.
