# Cloud migration acceleration

powered by

**././Adele**

 **OpenAI**

# What is Adele

## Adele Front End

### Data mapping generator

- Experimental
- Using generative AI
- In development

### ETL Re-platforming accelerator and ETL generator

Metadata parsing  
& processing

Generic  
conversion  
framework

Conversion plugins

PL/SQL to Azure Data Factory

PL/SQL to pySPark

T-SQL to pySPark

Informatica to Azure Synapse

...

## Adele Back End

# Informatika to Microsoft Synapse conversion

## ETL Re-platforming accelerator and ETL generator

Metadata parsing & processing

Generic conversion framework

Conversion plugins

PL/SQL to Azure Data Factory

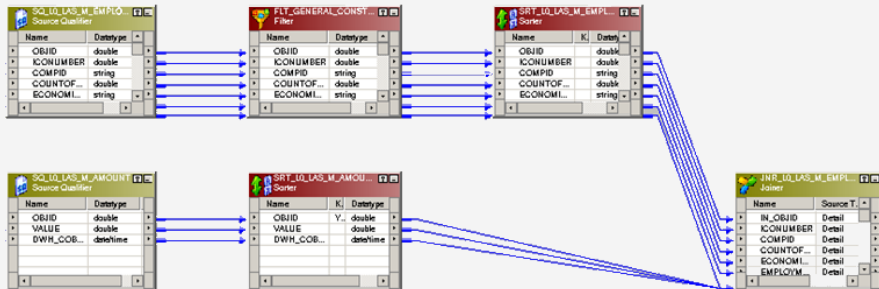

PL/SQL to pySpark

T-SQL to pySpark

Informatika to Azure Synapse

...

- key differentiator in Cloud Migration projects
- saves huge amount of effort associated with conversion from On-Prem Informatika to Microsoft Synapse data flows
- capable of automatic migration Informatika specific ETL patterns like local variables, mapping overrides, non resettable sequencers, Stored procedures etc.

```
source1 derive(o_batch_id = :v_batch_id,
              o_run_id = :v_run_id,
              v_batch_id := batch_id_lookup#lookup("R").run_id,
              v_run_id := run_id_lookup#lookup(:v_batch_id).batch_id) -> derivedColumn1
runtable sink(validateSchema: false,
             skipDuplicateMapInputs: true,
             skipDuplicateMapOutputs: true,
             keys:['status'],
             store: 'cache',
             format: 'inline',
             output: false,
             saveOrder: 1) -> batch_id_lookup
logtable sink(validateSchema: false,
             skipDuplicateMapInputs: true,
             skipDuplicateMapOutputs: true,
             keys:['log_id'],
             store: 'cache',
             format: 'inline',
             output: false,
             saveOrder: 1) -> run_id_lookup
```

Column	Expression
o_trim_code	trim(trim(code))
o_return_value	iff(o_comp_value == 1 && lin(l_v_test_equality... 12)

# ./Adele cloud migration accelerator with automated ETL re-factoring saving +90% cost

## Re-platforming and refactoring accelerator

# Thank you
