Microsoft Fabric: 1-Hour Briefing Call

Accelerate Your Data Potential

Microsoft Fabric is Microsoft's next generation all-in-one SaaS solution which centralises all data analytics and data engineering tools into one place.

Microsoft Fabric is a lake-centric software-as-a-service (SaaS) solution that offers data integration, data engineering, data warehousing, data science, real-time analytics, and business intelligence, all hosted in the one platform. This means organisations can process data from start to finish, without leaving the easy to manage environment. Designed to empower citizen-users to get the insights they need, Microsoft Fabric is built to optimise low-code/no-code features and will deliver an integrated and simplified experience of analytics.

THE BENEFITS OF MICROSOFT FABRIC

Microsoft Fabric offers multiple benefits for organisations looking to consolidate analytic workloads:

› Reduce time to value by unifying data management, analytics and AI

› Empower end-users and reduce dependency on IT

› Transparent and flexible cost management

› Easy-to-manage modern analytics solution

› Lake-centric and open platform

› In-built data governance and security

› Access AI powered experiences like Copilot

If you already have an investment in tools such as Azure Synapse Analytics and Azure Databricks you can still reap the benefits of Microsoft Fabric whilst retaining your existing investment. Inthis 1-hour briefing call, we will discuss the features and capabilities of Microsoft Fabric, as well as relevant use-cases that can be delivered by the new solution.

OUR APPROACH

› Overview of Microsoft Fabric platform and its capabilities

› Showcase of value-led use-cases that can be delivered through Fabric

› Discussion of your organisation's strategy and how Fabric can fit into this roadmap

Leading the Way in *Digital Transformation* for our Customers
